## Ads Stink?

Pete Valeo's letter isn't unusual. We get lots of comments about the many ads that run in *GamePro*. We admit that ads can sometimes get in the way when you're eagerly trying to find a particular article. In a perfect world, magazines wouldn't need to sell advertising, and every single page would be devoted to news, reviews, and preview.

But that's in a perfect world. In this world, it's the ads that enable us to create *GamePro*. The ads are a big part of what keeps us in business (the copies we sell to readers are the other big part). We could try to put out a magazine with no ads, but we'd have to charge so much for a copy that nobody could afford it. So when you come to the ads, at worst you should think of them as a necessary nuisance that make the rest of *GamePro* possible.

If you want to look at the ads in the best way, look at them for the intriguing questions they raise. Sorry, Peter, but it's not true that "nobody pays attention to them." In fact, under Peter's letter are six others from readers who were fascinated by what they saw in our ads. Ads might mention games you've never heard of, or use images you'd like to understand, or raise questions about future products you'd like to see more of. By studying the ads, you can learn a lot about what's on the horizon.

One final way to look at the ads is to study their art. Many of the entries we receive for our monthly "GamePro Gallery" art contest are re-creations of advertisements. Be thankful that video game companies use dramatic illustrations to catch your attention. It could be worse: At least we don't have any of those annoying perfume ads that fill fashion magazines!

### Mad About Ads

### Mad About Ads

I'm an avid reader of your magazine with only one complaint: the ads! Half your magazine is ads. Nobody pays attention to them, so why have them?

Pete Valeo  
Internet

#### The Unknown Gamer replies:

Nobody pays attention to them? See the next six letters!

Some of the ads for MK 3 have said "One has to pay dearly for immortality, one has to die several times while one is still alive - Nietzsche." What's Nietzsche?

Ryan Cameron  
Milwaukee, OR

#### Major Mike replies:

Nietzsche's not a what, he's a who. Friedrich Wilhelm Nietzsche was a 19th-century German philosopher who wrote nothing about video games but lots about how society should function. Among other things, he felt that the strong should ruthlessly exploit their natural advantages over the weak, which goes against what other philosophers were writing about "all men being equal." Nietzsche's ideas were taken to violent extremes by the Nazis 50 years later.

Your April issue had an ad for MK 3 on pages 112 and 113. What does that last strange symbol in the ad mean?

Benjamin Langford  
Clarksville, VA

#### The Axe Grinder replies:

We've had lots of letters with ideas about what that symbol means. Is it Raiden with an "X" through him to show he's not in the game? Is it a joystick with an "X" through it? Part of an elaborate password system? We asked Ed Boon, the game's programmer, for an explanation. He said it represents the four-armed Goro.

Your July '94 issue had an ad on page 25 showing Virtua Racing for the Genesis. Under the rating is a symbol of a steering wheel and the words "Steering Wheel Compatible." Is there such an attachment for the Genesis?

Anonymous

#### The Lab Rat replies:

Sega says that a steering-wheel peripheral for the Genesis was going to be sold last year, but those plans were cancelled. Instead, it has a steering wheel for the Saturn. It costs about \$80 and became available in June (see "GamePro Labs" this issue).

An ad in the March '93 issue listed the SNES CD System. I noticed in later issues that your magazine never mentions the SNES CD. I also noticed that the ad stopped listing the SNES CD. What happened? Was this just a misprint?

**Michael Porth**  
Internet

#### Bro' Buzz replies:

Not a misprint, just a premature ad. At the time Nintendo was publicizing the soon-to-be-released SNES CD, but unfortunately it never materialized and became the very definition of the term "vaporware." The ad wasn't referring to the Ultra 64 because that system hadn't been announced yet, and it will supposedly use cartridges, not CDs.

Want to see what a Super Punch-Out! expert looks like? Miguel Guasch of Santurce, Puerto Rico, sports the championship look.

What's up with Chips & Bits? In the back of your magazine it advertises home games for sale that aren't even out yet such as MK 3. How is this possible?

**Aaron Taylor**  
Granite Falls, WA

#### Bacon replies:

We get lots of questions about the tantalizing titles listed in those ads. Chips & Bits is a company that sells hardware and software through the mail. They take advance orders for not-yet-released home games like MK 3. If you order those games now, you'll

still have to wait for the games to come out like everybody else, but you won't have to go to the store to get them because they'll be mailed to you. Call 802/767-3033 for more information.

On page 21 of the May issue is a six-page advertisement for the Super Game Boy that mentions that the Super Game Boy now comes with a free 72-page player's guide. I bought my Super Game Boy before this deal, and I didn't get one. Is there any way I can get the guide for free?

**Jason Borchers**  
Internet

#### Bruised Lee replies:

You can get one, but not for free. You have to write to Customer Service, Nintendo of America, P.O. Box 957, Redmond, WA 98052-5111, U.S.A. Include this part number in your request: #31395. If you're writing from the U.S., include in your letter \$7.50 plus \$1.50 (\$9 total) for shipping and handling. In Canada, send \$10.50 plus \$2 for s&h. The guides are available only by mail, not through any stores.

### Shocks to The Systems

I've read many letters about how gamers are worried that their 16-bit investments are going down the drain. I, too, share these concerns, but I think we're writing to the wrong people. Writing to your magazine is one way to reach gamers and game-making companies, but you can also write directly to the companies that make 16-bit games (Konami, Capcom, etc.). If they get enough letters, they might keep SNES and Genesis games coming for a little longer. Although advanced systems are

coming, the current systems don't have to die just yet.

**Jerry Schmer, Jr.**  
Henderson, NV

#### Earth Angel replies:

You're right. Those addresses are usually on the game boxes or in the manuals. Keep in mind, though, that money talks. If nobody is buying 16-bit games and systems, companies will be reluctant to risk even more money on new games, no matter how many letters they get.

I don't get it! Why does Sega keep coming out with more and more new systems? I bought a Sega CD a while ago, and the next thing I knew the 32X was coming out. Now I'm hearing about the 32X CD, Saturn, Neptune, and Nomad. It's not like we are all walking money trees!

**"KBall"**  
Internet

#### Toxic Tommy replies:

Good point! Check out the letter from the GamePros in July's "The Mail" because it addresses something similar.

### The Magazine Biz

Why have you stopped reviewing Mario games? My friends and I love Mario games, but we don't know what's available because you've stopped reviewing them.

**Travis Lee**  
Springfield, TN

#### Coach Kyle replies:

We haven't stopped reviewing them, Nintendo stopped mak-

ing new ones! The last Mario-related game we reviewed was in June - Mario Picross, a puzzle game for the Super Game Boy. The next one we review will be Yoshi's Island for the SNES later this year.

We've reviewed every Mario game since 1989. Call our Back Issues department (415/361-0310) to order those older magazines.

An about-to-be-finished picture of Bullet Bill in Mario Picross for the Super Game Boy

### Cart Queries

I've been playing Sunset Riders on the SNES, and I think it's a great game. How did it rate with you?

**Daniel Badovinac**  
Canyon Country, CA

#### Doctor Devon replies:

Sunset Riders rode off with some pretty impressive ratings in our December '93 issue.

### Things We'll Never See

I have an idea for MK 3: the Cookality. You beat your opponent, rip off their head, throw it in an oven, take it out, and eat it.

**Chris Reynolds**  
Alton, IL

**Tommy Glide replies:**  
Toasty!

# The Virtual Boy: Better Red

Nintendo turns virtual reality into the real deal.

By The Whizz

**A**t a time when many game system manufacturers are charging hard to establish the dominant home system, Nintendo comes up fast on the outside—and off the wall—with the Virtual Boy. On August 14, the Boy makes its entrance.

## Virtual Space

The Virtual Boy is a standalone tabletop unit that looks like a pair of oversized goggles on legs. The viewer, big enough to comfortably accommodate an adult with glasses, is designed to eliminate all external stimuli. It totally immerses players in a monochrome world consisting of high-resolution red images against a deep black background.

The 32-bit virtual-reality system, powered by six AA batteries, is built around a RISC (reduced instruction set computing) chipset. It uses two high-resolution mirror scanning LED displays to produce a 3D image and therefore requires hefty processing powered by an NEC V810 CPU.

## Simply Red

Monochrome visuals may turn off some people, but don't knock it 'til you try it. The Boy's

3D effect is mesmerizing!

The Boy goes red thanks to Reflection Technology's virtual display technology, the Scanned Linear Array (see "Cutting Edge," March). Combining two displays into one processing unit produces 3D graphics with complete depth perception and rotational movement.

And the proof is in the play-

ing. For example, in Mario's Dream Tennis, the behind-the-player view makes you feel like you're right on the court. Red Alarm is a shooter that enables you to fly completely around or under objects with an impressive 360-degree viewing perspective.

The Boy's radical, twin-

handled controller adds to its high-tech styling. The design consists of double pistol grips mounted on either side of a control pad, which features the on/off switch, dual directional pads, and six action buttons, including two front-mounted "triggers."

## Boys Will Be Boys

For all of its impressive technical innovation, however, the Boy has a few practical drawbacks. The system costs \$174.95, and carts run from \$30 to \$40. That places the system noticeably below the \$249 to \$399 price range of the Saturn, PlayStation, and Ultra 64, but it's enough to make you think twice about buying a second system.

Additionally, though Nintendo reports that the six AA batteries will last six hours, there's no AC adapter yet. Moreover, even though the Boy is battery operated, it's too bulky to be portable unless someone produces a shoulder mount.

The Virtual Boy is no mere toy. Even though the Saturn, the PlayStation, and the Ultra 64 seem set to command the video game arena, many gamers could be seeing red. **G**

*The simple looking Virtual Boy maintains Nintendo's reputation for finely crafted hardware. It even features the traditional Nintendo mystery connector, in this case a four-contact connector underneath the eye-piece.*

# Virtual Boy Games

These games will be available from Nintendo at launch.

## Mario Clash

This one-player action/adventure puzzle is a little side trip in the Mario series. You can move from front to back on the screen as you clear a path through Goombas, Koopas, Spinys, and Mushrooms. Clash was designed by Shigeru Miyamoto, the creator of Mario and Donkey Kong.

## Mario's Dream Tennis

You rally on the tennis court with a familiar cast of Nintendo characters, including Mario, Yoshi, and Donkey Kong Jr. Mario's Dream Tennis serves a great game of tennis thanks to the behind-the-player view that enables you to hit forehands, backhands, overhead smashes, lobbs, and volleys in singles or doubles games. The computer controls your doubles partner, and it's pretty good.

**\$39.95**

## Telero Boxer

Here's in-your-face robot fighting that will make you jump out of your seat. You go toe-to-toe with your mechanical opponents via a first-person perspective looking between your gloves. Hooks, jabs, and various sucker punches seem to fly out of the screen. Your foes get stronger as you go.

**\$39.95**

## Red Alarm

This space shooter's wire-frame images look positively simplistic...until you start to play! Red Alarm's like an awesome stick-figure StarFox with a behind-the-ship view that enables you to fly over, under,

## Galactic Pinball

This could turn out to be one of the best pinball games around. The bumpers, flippers, and other pinballs on the five tables seem to float in outer space. The "balls" are actually pucks that move with blazing speed. You encounter hidden bumpers, basement-level tracks, and weird 3D ramps that

appear to snake out of the screen. Watch out for the UFOs.

# HOT AT THE ARCADES

## By Bruised Lee

**W**hen Midway first obtained the NBA license and proposed a game called NBA Jam, there was some concern that a basketball game wouldn't be hugely successful in the arcades. NBA Jam quickly blew away the skeptics, earning the game a prominent place in arcade history. And now history is set to repeat itself as Midway corners the WWF license and turns out a wrestling masterpiece.

## The Main Event

At a glance, you can clearly see that WWF Wrestlemania is one of the best-looking digitized games around. The amount of detail and color used in the game sets a new standard. WWF features eight of the biggest, baddest boys to kiss the canvas: Doink the Clown, Razor Ramon, Bam Bam Bigelow, Shawn Michaels, Yokozuna, The Undertaker, Lex Luger, and Bret "The Hit Man" Hart.

Each character has their own personal moves along with grabs, power grabs, power moves, reversals, and quick outs. In all, each brawler has more than ten moves. The wrestlers are free to roam inside and outside the ring, and

you can even climb the ropes for a turn-buckle attack on an unsuspecting victim.

WWF has four play modes, including two one-player modes and a two-on-two mode where you and a friend can jump in the ring and simultaneously pounce on the computer opponents.

The controls in WWF are similar to those in MK: two punch buttons, two kick buttons, and a block button in the middle. In addition to the game's regular moves, players can execute high-hitting combos. Each character also has a

Gameplay time is extended for each enemy fighter you shoot down. When your aircraft takes a hit, however, you momentarily lose control. The missions include a variety of land and sea terrain as you dogfight your way to victory.

game's check points are nonlinear, so you can race the more exotic locations on the map at will. For example, cruise through Hawaii, where surfers and swimmers face some unexpected weather, or check out Sweden as you race through ski grounds and hit stellar jumps.

The game's view puts you right behind your bike, similar to the perspective in Road Rash. You can

## THE GAMEMAKERS:

# The Artists

Our ongoing look at the people who make games continues with artist Jason Leong, one of the prime creators of *Primal Rage*.

By The Feature Creature and The King Fisher

### JOB LISTING: VIDEO GAME ARTIST

Must have creative imagination and the ability to express ideas visually. Excellent drawing skills and knowledge of computer-illustration programs required. Comic-book or gameplaying background a plus.

Using pens, pencils, and keyboards, artists turn the ideas of the game-making team into visual realities. The artist's drawings give life and detail to vague concepts, clarifying characters and backgrounds. We asked Jason Leong, one of the top artists at Time Warner Interactive, to tell us in his own words about his daily job and his work on *Primal Rage*.

### The Background

"Being a member of Generation X, I grew up with the first generation of video games. It was every kid's dream to work on video games because they were such a large part of our lives. However, I didn't really

pursue that career path—I just wanted to draw cartoons and comic books. I loved games, but I figured I probably couldn't get into that field.

"In high school, I took art courses, and though I thought I had the talent to draw comics, they didn't seem like a realistic option. So I took an internship at a nonprofit graphic-design studio. The internship was great because it was with a small company, so I got direct hands-on experience doing small things like logos and business cards. The best part for me was that the atmosphere was very supportive, which might not have been true at some huge company where I would've ended up just getting coffee for everybody without ever working creatively.

"I reached Time Warner almost by accident. In 1991 a friend told me about his job

there and that they were looking for new blood so they could compete with *Street Fighter*. Even though I'd prepared myself to go into graphic design by learning the Mac and different illustration programs, none of that was relevant when I interviewed. Just to show them I could draw, I dug up old flip books and odd drawings I'd done for fun when I was in high school. Surprisingly, I got a job. I began working on *Moto Frenzy* for the arcade, drawing tire animations for the motocross action. I must've drawn 500 frames of tires spinning and dirt flying.

"Every year the company throws a brain-storming session where everybody brings

### The Birth of Blizzard

Blizzard went through several transformations in Jason's early sketches before he became the ape you've come to know and love.

**Team Rex**, the title of Jason's 1994 drawing and the nickname for the gamemakers who worked on *Primal*

## The Job

"As an artist, I drew the game's characters on paper first, showing the dynamics of their movements and giving them the visual details that make each character engaging. I had a lot of freedom on *Primal Rage* as I designed the characters, but eventually everybody had input into them, and the final results really are a team effort.

shop to design title screens, credit screens, high-score screens, and things like that. We also did a few special computer animations of bodies squashing and stretching, extra blood splatters, and other special effects."

## The Advice

"The best way to become a video game artist is through school. You can't beat it: School

shapes your talent and gives you a work ethic. This doesn't mean getting A's in science and P.E. It means exploring different subjects and ideas. School gives you many of the things your character is built on. Think about *Primal* – we discussed archetypes and temples and gods and dinosaurs, so I had to draw upon a wide range of knowledge that I hadn't

up new game ideas. A few years ago I brought up the concept of a head-to-head dinosaur fighting game, which coincidentally someone else also brought up, but their idea was just two T. rexes fighting. My original write-up included ideas that finally appeared in the game, such as different species of quickly moving dinosaurs and the concept of the dinosaurs being gods. The *Primal* team quickly grew, and I moved up to lead animator and then art director, coordinating and administering the staff and the many contractors we worked with. On *Primal 2*, I'm taking more of an administrative role, doing more talking and writing than drawing."

In the next-generation version of *Primal* coming out in the fall, Jason appears in some of the end sequences. Here he is lying down on the job in front of the T. rex.

"The *Primal* drawings were then given to a stop-motion animator, who made models and moved them around. Meanwhile, other artists and I worked on the computer using programs like Adobe Photo-

Jason's first job in the video game industry was creating the tire animations for the arcade racing game *Moto Frenzy*.

planned on. The more you know, the more you'll shine.

"It's also important to be a gamer. I try to look at all the magazines and all the games, focusing more on imagery than on gameplay. Look at everything that's out there and become what's called a 'culture culture.' Become a sponge for all sorts of different things and keep your mind open because you never know how you're going to use it down the road. I can't get enough of reference books and movies – they're all relevant to what I'm doing if I look at them closely and try to learn from them.

Jason says this is the "first officially printed professional logo" that he sold; it's for a video-rental store.

"Another major consideration is location – you'll probably need to move to where the business is, which means the Bay Area. When we hire artists from around the country, we ask them to move out here because realistically we need them nearby.

These 1992 sketches represent Jason's ideas for a boss character for an Atari game that never made it to production.

Jason has an amazing notebook filled with hundreds of drawings that he did early in high school. This one page is typical. "Dragons, dinosaurs, and fantasy creatures were always fun to draw," he says.

This 1992 sketch is called Cramming for Finals.

Jason in his first year at San Jose State University (1988)

## Primal Primer

"And keep working at your drawing. It's not like riding a bike, where once you learn it, you've got it. Drawing requires constant practice, even if you're born with a lot of talent. Stay focused on your work and don't just draw blindly – question what you're drawing and be sure you've exhausted all the alternatives before you commit to a final decision.

"Finally, keep an open mind because nobody gets to do everything their own way. Ultimately you'll wind up working with other people in a team structure, which forces everybody to compromise somewhat. The team may come up with better ideas, or the parameters of the project may change, or there may be late financial restrictions on what you're doing, so you have to be open to change. If you can't get it your way, there are other ways to make it happen and still be good." **G**

Flexible armatures were made and inserted inside the latex "skin" of each dinosaur.

The models were filmed using stop-motion animation, which required the filmmakers to painstakingly move the models a fraction of an inch for each frame of film. For more insight on Primal's stop-motion technique, see "The Making of Primal Rage" in the November 1994 issue or check out the upcoming Official Primal Rage Players Guide, which is published by Infotainment World Books.

Jason's sketches were turned into three-dimensional models by model maker Dan Platt.

# Presenting the Sony PlayStation

Sony's 32-bit PlayStation debuts this month – so what do you get for your \$299? Check out the hardware and the first wave of the software that will be available this fall.

## By The Whizz

Let the next-generation video game war begin! The Sony PlayStation goes on sale nationwide September 9. So begins the long-awaited head-to-head struggle with the Sega Saturn for the hearts, minds, and disposable incomes of gamers everywhere.

What you get: The PlayStation's \$299 price tag purchases a system unit and one controller. Unlike the \$399 Sega Saturn, the PlayStation will not feature a pack-in game.

## Under the Hood

The PlayStation's gameplaying power comes from good ol' American know-how. LSI Logic Corporation of Milpitas, California, designed and manufactured the system's custom CPU microchip, which consists of three high-performance processors: an R3000A Mips 32-bit RISC (reduced instruction-set computing) microprocessor, a complete graphics engine subsystem, and a high-resolution full-motion-video decompression subsystem. Further boosting the

PlayStation's processing speed are a double-speed CD-ROM drive, 16 megabits of primary RAM, and 8 megabits of V-RAM.

Fewer chips and fewer connections speed up coded game instructions and cut down dramatically on the internal silicon, which keeps the PlayStation's size compact. In fact, this classy-looking

system has a footprint that's smaller in length and width than this issue of *GamePro*!

## A Cool Exterior

The PlayStation also sports a sleek, simple external look. The front of the unit has two slots

for controllers or a mouse and two additional slots for credit-card-sized memory cartridges that can save game data.

In the rear of the system, you get standard AV connectors and a communications port. First-generation Japanese PlayStation featured a built-in S-Video

connector, an outstanding idea that was unfortunately axed from the American unit.

**PRO TIP:** Check out PlayStation ads for hidden Ridge Racer codes (see *ProReviews* this issue).

If you own a TV sans AV outs, you can purchase an RF adapter. The communications port will support Station-to-Station gameplay via the Combat Cable connector.

## Power Playing

The Sony PlayStation puts in place a major piece of the

puzzle that is the future of video games. Its arrival certainly transforms 32-bit gaming from the "next" generation into the "now" generation. **G**

## A Word About Reservations

Sure you can reserve a PlayStation at some stores, but it'll cost you. According to Sony Computer Entertainment, for \$25, some – not all – retail outlets will hold a PlayStation in your name. The catch is that your \$25 will not be deducted from the \$299 price tag. If it's any consolation, you'll receive a CD+G disc with music and PlayStation previews.

## ESPN Extreme Games

ESPN Extreme Games is based on the popular sports show that airs on ESPN<sup>2</sup>. The sports pit players on in-line skates, mountain bikes, skateboards, and street luges against treacherous outdoor courses in San Francisco, Lake Tahoe, Hollywood, Utah, Rome, and the South American jungles.

Each mode of transportation has its own advantages. The skateboards, for instance, offer fast downhill racing, while the mountain bikes enable you to traverse the rugged jungle terrain.

You compete from a Road Rash-style behind-the-racer perspective with two-player

split-screen action juicing the intensity. Hard-driving music, commentary from ESPN announcers, and hidden bonus levels help make this game extreme entertainment.

## Air Combat

This high-flyin' polygon shooter arrives on the PlayStation with all its arcade features intact. Using three perspectives on a realistic texture-mapped world, you fly intensely authentic *Top Gun*-style combat missions against waves of enemies with the clock ticking. Three special bonus stages, four difficulty levels, varied terrain, aerial dogfights, midair refueling, and carrier landings are all part of the dizzying action.

By Namco  
Available September

## Knights of Rage

This flight sim is set in the near future when maniacal dictators and random violence dominate the world. You're both pilot and tactician in one of six custom helicopters, flying missions for an agency trying to restore peace. Unique choppers with their own experimental weapons systems, varied missions that range from transport jobs to assassinations, and realistic effects should make this an intense aerial experience.

Available October

## Destruction Derby

Daytona with wrecks—that's Destruction Derby in a nutshell. You race big, fast stock cars on realistic-looking circuits, but unlike Ridge Racer and Daytona, damage is the name of the game. Inflict it, but also avoid it because your car will handle differently as it gets pounded. Ten-car pileups won't be uncommon on these busy tracks. A head-to-head racing mode and a no-rules attitude could put this one in the winner's circle.

## Jumping Flash

What's up, doc? A huge mechanical rabbit, aliens, and a world full of weird enemies, that's what. Playing from a first-person perspective, you bounce your strange rabbitlike craft onto elevated platforms scattered across col-

orful 3D landscapes. You also navigate through hallways for a little Doom-style search-and-destroy action. Eye-popping graphics and unique gameplay should dazzle fans of novel action/shooter games.

## Team 47 Goman

One of the PlayStation's most innovative games comes from a new company called 47 Tek. The producers have created a true 3D world for Team 47 Goman, a game that puts you inside building-size mechs to vanquish huge alien monsters. Play Goman as an action/shooter, a head-to-head fighter, or a strategy game in settings like Tokyo, New York, and Hawaii. Amazingly fluid

movements, detailed creatures, and thoughtful gameplay add up to a potential PlayStation powerhouse.

## Primal Rage

Primal Rage bites into 11 home systems this year—and of all of them, the PlayStation version may be the fastest. As in the popular arcade game, you pit seven imaginary gods from the dinosaur era against each other in vicious two-player claw-to-claw combat. Sauron, Vertigo, and the rest are here with all their arcade moves, combos, and finishing sequences intact. New cinematic intros, victory animations, a training pen, and a tug-of-war mode help make Primal a major rager.

Exclusive  
Guided Tour

# Producers Play the PlayStation

Sony Imagesoft's producers give us a guided tour through Warhawk and Twisted Metal, two of their hottest PlayStation games.

## Warhawk Words

### Associate Producer/Designer Mike Giam:

"In Warhawk, we were trying to create a flight-action game that nobody had seen before. Games like AfterBurner are shooters that just happen to have planes in them, whereas in Warhawk we actually give you the sensation of flight.

"From a gameplay standpoint, I think we're really striking into a new territory. Think of it as a *Top Gun* attitude in a 3D Desert Strike game. There's a definite mission, as in Desert Strike, but how you go about it is up to you. We looked at shooters like AfterBurner and StarFox, and we juxtaposed their arcade feeling with the freedom of a computer flight sim. Warhawk's very accessible - it's also two-player with one player as the pilot and one as the gunner.

"Your mission is to locate the fuel source of an evil dictator. In the first level, the desert, you must destroy four towers; once you do, a second line of defense appears, which is a huge rising fortress.

"Enemy jetfighters and ground defenses pursue you

as you go. You determine how you want to fly: You can either take on the primary targets and then deal with the ground and air support, or you can systematically try to take everything out, which takes longer. The fuel is inside the fortress. There are different ways to get inside.

Three views of the desert mission

Attack in the canyon

"Next is the canyon. You're trapped there by a force field, so the only way out is to run the canyon, and there are multiple pathways.

"The canyon's a mixture of the Grand Canyon and the

Dogfight action outside and inside the airship

Death Star trench in *Star Wars*: You'll face armored gunboats, floating mines, missiles, and fortifications on the walls. The flight culminates with a battle against a heavily fortified bridge across the canyon.

"The third level involves an attack on an airship over the open ocean. Imagine four aircraft carriers, stick them together, double them, and that's what you're fighting.

"First, you must fight your way into it past four smaller escorts. It's a very dogfight-oriented level.

"We've created a different kind of gameplay for each level: The desert is very wide open, the canyon is a long gauntlet run, and the airship level requires lots of dogfighting, all in full 3D."

### Last Levels

"The next level has a large volcanic island surrounded by tall stone spires. The area is very

### Fiery action outside the volcano

dark and foggy, though you can pierce the cloud layer and fly into the bright sunny sky.

"Enemy jetfighters and huge flying gunships are everywhere. You must work your way into the volcano to reach the labs where the fuel source is.

"The last two levels are more sinister, almost Gothic

and foreboding. They will provide the culmination of everything you've seen. Your flying skills will need to get better and better. There are also some secret areas you'll encounter."

### Control Quotes

"Warhawk has an interesting control setup. We've given

the player as much control as possible while still making the gameplay accessible. The jet is like a Harrier, so you can both fly and hover. Your guns, missiles, and afterburner are on the thumb pad; more advanced players will use the shoulder pads for tight turning, banking, and sidestepping. The basic armaments are machine guns and missiles, plus you can pick up things like doomsday bombs.

"I like the game's flexibility. You can play it slow and strategic, or you can go all out for fast, heavy-duty thrills. You'll have a real flight-action experience with War-

hawk. I doubt that it could be done on any other system right now."

## Talkin' Twisted Metal

Standing atop Sony Imagesoft's L.A. offices, Mike Giam and David Jaffe hold some Warhawk and Twisted Metal artifacts.

**Associate Producer/Designer Dave Jaffe:** "With Twisted Metal, we were inspired more by movies than by other games. Our main goal was to create that adrenaline rush as if you were in Road Warrior, T2, or an old Spielberg movie called Duel.

"From a gameplay standpoint, we wanted

to get beyond Rock 'N' Roll Racing, which was an amazing game, but it limited you to simple tracks. To us, a great car chase would have camera cuts and varied terrain so you could leave the track and drive through tunnels and across parks. We wanted to give the player total envi-

ronmental freedom as they rammed and chased

and shot at other cars.

"Twisted Metal has four overall worlds. The first one is intentionally quite small because we wanted gamers to get used to the controls on the vehicles. You're in an

underground rave-club arena, going head-to-head against another vehicle. You destroy ramps and crates plus you can shoot missiles into the stands.

"Once you destroy your opponent, the doors open and you're out in this giant 3D world. This second world is Los Angeles in the year 2005, broken up into three distinct areas. You'll see freeways,

## To Live and Die in L.A.

"As the game progresses, the levels get bigger and bigger so by level three, Suburbia, you're in a 3D world with an area of eight square miles.

"We included L.A.'s water canals, freeways, and churches because we really wanted to bring the gameplay home to the player—it's not set in outer space, it's set in your own backyard. You can do things like spin donuts in the high-school parking lot or have shootouts in front of 7-11s.

"The last level is on top of skyscrapers in downtown L.A. You jump your vehicle across rooftops, leading up to this really interesting, never-

Go!n' for the ice-cream truck in the suburban level.

A Twisted take on a suburban traffic tie-up

before-enemy that has a surreal, nightmarish exterior.

"Included in Twisted Metal are some of the twisted fantasies that most drivers in L.A. have, such as running over ice skaters, destroying a Salvation Army Santa Claus, and knocking down pedestrians. The Santa Claus is in there because we figured a lot of players would get this game for Christmas, and by then they'd be so sick of the holiday that they'd need a twisted release."

## Vehicular Manslaughter

"The vehicles are all unique. We wanted to have vehicles that would appeal to different

personalities, so we have a giant semi truck if you're feeling bullyish and just want to ram people; a dune buggy that's quick and tenacious; and a red sportscar if you want speed.

"Weapons include missiles, oil slicks, and flamethrowers. Every vehicle has unique special weapons: The ice-cream truck shoots out flaming ice cream cones, for instance.

"The cars all handle differently but they can all do T-stops, 360-degree turns, bootlegs, jumps, and ride briefly on two wheels. And there's a two-player competitive mode on a split screen!

"In Twisted Metal, you'll really feel like you're there. It'll take a lot more than just shooting as fast as you can to survive." **G**

## From Space Stations to PlayStations

The developers for Warhawk and Twisted Metal are a Utah-based company called Singletrac. The company's founders formerly worked on a range of complex military and NASA projects, including simulators for the space shuttle, space station, F-14 fighter, and Apache helicopter.

This shot from a NASA flight simulator conveys the type of realistic 3D graphics now being developed for PlayStation games. This is a simulation of a shuttle landing at Edwards Air Force Base, escorted by a T-38.

## PlayStation

By Major Mike

Just as the Saturn hits the streets with Virtua Fighter, here comes the PlayStation with a polygon-rendered fighting game of its own – Battle Arena Toshinden. Looks are where the similarities end, though. Toshinden's fireball-motion fighting style is too easy for most fighting fans.

### Diverse Fighters

Toshinden has eight fighters that differ in nationality and

You can change your controller configuration and other options in the middle of a fight.

**PROTIP:** To do Fo Fai's Walking Ball move, motion ← ↓ ↘ Hard Slash or Weak Slash.

**THE PLAYSTATION DOES A LITTLE VIRTUAL FIGHTING OF ITS OWN WITH TOSHINDEN.**

With simple, easy-to-perform moves, the visuals surpass the gameplay. Still, it's an enjoyable fight.

**PROTIP:** Be careful when you get close to the edge of the arena – you and your opponent could both fall off for a Draw game.

fighting style. For example, there's Sofia, a leather-clad beauty who uses her trusty whip; Fo Fai, a giddy, elderly noisemaker who uses long metal claws; Duke Rambert, a knight in less-than-shining armor with a long sword; and Ellis, a giggling little girl who looks as if she's wearing a wedding dress and carries two long knives.

The button scheme is straightforward: two for kicks, two for punches. You can configure the top two buttons for instant special moves or use them to side-step your opponent. The controls are very responsive, and the special moves are easy to execute. Side-stepping is an especially effective tactic because you can avoid attacks, then sneak behind an opponent and smack them with a special move.

One of the biggest problems with this game is the

**PROTIP:** To grab your opponent for a throw, get close and press Away with a Hard Slash or Kick.

Death moves. These can be performed only when your life meter is flashing red, and they provide a last-ditch opportunity to inflict major damage. They vary in complexity from character to character but are relatively easy to pull off.

While the Death moves are cool, there is a tendency to rely on them too much. For example, you could let your opponent beat you up until the Death move can be applied, then use it repeatedly. So much for strategy.

### Awesome Processing

The graphics processing on the fighters is incredible, though the moves are very simplistic. One advantage of this play engine is that it provides the ability to chain special moves, or perform the motion for a special move while currently executing one so they are chained in rapid succession. While this may seem

advantageous, it's easy to get carried away – if you miscalculate, you could leave yourself open for an easy counterattack.

The very limited combo system lets you intermix standard punches and kicks with special moves but few air jugs. This game relies more on flash than fighting.

There are three play modes: 1P Game, Vs. Human, and Vs. Computer. The first is a story mode with two end bosses, while Vs. Human is a two-player fight, and Vs. Computer

**PROTIP:** Use the side step to sneak around your opponent for a throw or a hit.

# BATTLE ARENA Toshinden

enables one player to fight against a computer opponent of their choice.

## Unique Views

Rather than the usual side view, Toshinden uses a camera angle that constantly zooms around the battlefield. Amazingly, you always remain in complete control of your fighter because the perspective never skews your perception of the controls.

Each stage has a limited battle area (though much bigger than the one in *Virtua Fighter*), and most stages take place on elevated platforms. Fall off the platform, and you lose a round – and you have to hear yourself scream all the way to the bottom!

Most stages are beautifully rendered, especially Kayin's stage where gigantic television screens display the ac-

tion. This stage, however, tends to slow down when you fight in front of a giant screen, hampering the action. Slowdown also strikes in Gaia's stage, which takes place on a transparent chessboard over a black hole.

## Speaking in Tongues

Soundwise, the vocals and collision effects overshadow the music. The voices are perfectly understandable – rang-

ing from Kayin's intelligible English ("Deadly ray!") to Sofia's Russian where she says something on the order of "Toaster thing!" Various collision sounds are cleanly conveyed from Ellis's knife slashes to Sofia's whip snap. The music, though, is so-so with only a few standout pieces.

With its stunning visuals, *Battle Arena Toshinden* is as fun to watch as it is to play.

**PROTIP:** Keep your distance and use projectiles when fighting the boss Gaia – his close attacks can shred you in seconds.

Beautifully rendered fighting stages punch up the action.

Had there been more technique involved, this arena could have been a real contender. It's a formidable effort, but fighting buffs may pick this game clean too quickly. **D**

**By Scary Larry**

Fast-paced racing action on a home system? For racing fans who were disappointed by the arcade port-overs of Daytona USA and Virtua Racer...fear not! Ridge Racer for the PlayStation is everything its arcade team-mate was – and more.

### Go, Ridge Racer, Go

All the arcade thrills are intact. As in Daytona, you choose from four blazing standard vehicles, but Ridge Racer has eight "hidden" cars, too (see ProTip). Moreover, each course is beautifully rendered, unlike

the stiff-looking polygon tracks of Virtua Racing.

The track is limited to three courses, but they're enough to satisfy your need for speed. The first course pits you against a 12-car

**PROTIP:** You don't need to brake to make it safely through some curves.

**PROTIP:** While the game's loading, get a perfect score on Galaxian to choose from eight additional cars!

**PROTIP:** Keep a finger on the accelerator and rest another lightly on the brake. When going into curves, hold down both buttons simultaneously to prevent your car from fishtailing while maintaining top speed.

**PROTIP:** A good passing tactic is to move up to a car's rear bumper, then swerve into the car as you're taking a turn.

lineup over two laps, the second course adds a third lap, and the third course is just you against a blazing yellow Ferrari. If you place first in these three courses, you race on reversed tracks. The final race against an elusive black Lamborghini Countach will

gain you respect...and, reportedly, the right to drive the Countach.

### Vroom with a View

The superb graphics take the checkered flag over Daytona. The awesome rendering depicts beautiful cars, rural and city landscapes, helicopters, and more...but you'll only see them for a split second as you zoom past.

Ridge provides only two views – through the wind-

**PROTIP:** For the best start, gun the engine during the countdown when the timer reaches "1." Then swerve to the right and let cars you've passed bump you, which adds to your lead.

quickly after a crash, while others can take turns with reckless abandon.

### Live'n' on the Ridge

The best racing game to date for home systems, Ridge Racer definitely outpaces Daytona USA. Until Cruisin' USA for the Ultra 64 arrives, Ridge is king of the track.

**PROTIP:** Go wide into curves, especially in the tunnels where obstacles lurk.

The sound is another definite plus. Without any of Daytona's caterwauling, Ridge

The gameplay is straightforward: You must make it in one piece to the Bug Stop at the end of each gigantic stage. The stages are loaded with such hidden items as extra lives, special powers, and blue diamonds that you collect to gain entrance to bonus levels.

Look at who makes a cameo! Is Bug faster than Sonic?

## Bug Eyes

What makes Bug! so enjoyable are the huge levels and excellent graphics. Bug! has a fantastic zooming perspective that follows our hero as he moves horizontally and vertically around the screen. Vertical path up ahead? No problem! Bug walks right up it. Bug walks to the right and left, toward and away from you.

One of the problems with this ever-changing perspective, however, is knowing exactly where enemies are—especially when you're walking forward or backward. At times it's easy to over- or under-shoot an enemy, and you take the hit. The stages themselves are set high above the ground and if you're not careful, one false move could send you spiraling to your death.

The controls are good for the most part. The exception is when you're undertaking multiple jumps. When you jump on enemies several times, you don't always leap exactly where you wanted. Sometimes this inaccuracy

**PRO TIP:** Collect the big coin, then go to the shower head by Daddy-O Longlegs. You then enter a timed bonus stage for a chance to win extra lives.

causes you to take a hit or go flying off the edge.

## Bad Case of Buggin' You

Excellent music and vocals underscore this game. Jazzy music complements the action and paces Bug's every step.

The vocals are also done well, but those easily annoyed by Bug's nasal one-liners (like "Bang and a miss," "I hate that,"

**PRO TIP:** Keep moving when Bug climbs up a wall. Items are likely to drop on him or enemies to fly into him.

and "He shoots, he scores") will be grateful to discover that he can be silenced in the Options menu.

The game is difficult with checkpoints spaced far apart in the huge levels. While this increases the game's challenge, it can also be aggravating.

Bug's enemies vary in difficulty, from slow-moving snails to spastic praying mantises. You may find that sometimes it's easier to take the hit and flicker past an enemy than to figure out a way to defeat it.

The boss characters are big and menacing. Some have

**PRO TIP:** Never try to take on the 852s head on. Jump on their backs to defeat them easily.

easily detectable patterns, however, that make them minor nuisances.

## Bug! Is a Wonderful Thing

For a system with no spokes-person (or spokeshing), Bug! fills the role nicely for the Saturn...for now. As the Saturn is still in its infancy, Bug! is an excellent game even with the lead character's annoying one-liners. **B**

# SAMURAI SHODOWN

**By Scary Larry**

Looking for a Neo-Geo portover with some power to it? Keep looking. Although this Sega CD version of Samurai Shodown is enjoyable, it isn't as polished or good looking as it should be.

## Catcher in The Samurai

Based on the arcade smash from more than two years ago, Samurai Shodown is yet

**PROTIP:** Kyoshiro's Fire Attack can be deadly, but with the correct timing, you can jump over it and hit him.

**PROTIP:** Your kicks and punches seem to have more power when you're harmed.

**PROTIP:** When fighting as Gen-An, get close and press **Fierce Punch** for this devastating corkscrew attack.

another Japanese two-player fighting game. You play as one of eleven fighters (the twelfth original fighter, Earthquake, was removed) in a fight-to-the-death battle.

You have a unique mix of fighters, too, from a foil-wielding female fencer to a dog-wielding American ninja. Each fighter is armed with razor-sharp weaponry and some fancy, screen-bursting special moves.

## Samurai Slowdown

The graphics are eye catching but flawed at times. Crisp, clean, colorful animation is of-

ten interrupted by slowdown, missing frames of animation, and clunky moves. Also missing is the SNK trademark of scaling in and out of the background.

The game also suffers from long load times. The game accesses the disc between rounds, after a win, and when you're waiting for a friend to join. You'll see the "Disc Access" symbol more than any actual fighting.

The sound and music are disappointing. The eerie Japanese-sounding music is everywhere, but the effects sound like nasal reproductions from the arcade game.

Game control is a breeze if you have a six-button controller. Three buttons for fierce,

**PROTIP:** Air attacks cause more damage to your foe.

**PROTIP:** The basics work well here. Throw a projectile, then follow it in with a blistering special attack.

**PROTIP:** The Medium Punch button produces some low-blow slashing. Use it if you miss a close opponent with an attack.

medium, and light slashes and three more for fierce, medium, and light kicks make guiding your fighters a snap.

## Shodown at the So-So Corral

Ultimately, one major oversight enhances this game's faults: It's nearly three years old! Samurai Shodown II has already been in the arcades for a year, and this portover has missed the boat.

There are better fighting games out there. You just have to wave your sword a bit to find them. **G**

**PROTIP:** Certain characters have stun attacks, such as Gen-An's Poison Cloud Puff.

## Genesis

By **Alr Hendrix**

Primal Rage stomps from the arcade to the Genesis without even denting the plastic on the 16-bit hardware. Finger-snarling controls leave a scratch or two, but solid arcade gameplay and respectable graphics will snare fighting fans.

### Total Domination

The seven original dinos and apes duel to rule once again, commanding the same blistering special moves and combos

**PROTIP:** As Armadon, catch your opponent in midair with a High Quick followed by a High Fierce.

that they did in the arcade. Each prehistoric power lashes out with six standard moves (high and low quick, fierce, and power strikes), as well as a sweep and an uppercut. Winners of the best-two-out-of-three matches gain the loser's land and worshippers.

The fast, smooth gameplay

**PROTIP:** Sauron's Granium Crusher (hold High Quick and Low Fierce, then tap Down, Up) effectively takes out opponents when they jump in.

**PROTIP:** Slash foes from afar with Vertigo's Scorpion Sting: Hold High Fierce and Low Quick, then tap Toward twice.

revolves around combos: One-hit attacks, even if they look brutal, never pack the heat that a wicked five-hit combo does. The search for effective combos—and the practice required to pull them off—makes for fun, deep action that outshines the less-polished SNES version.

### Quick Kill?

The controls exactly duplicate the four-button arcade layout, but they should've been

adapted to fit home controllers. Many special moves are executed by holding down three or four buttons while motioning on the directional pad—a feat that only the most rubber-limbed gamers will be capable of on a three- or six-button pad. With a fighter's joystick, this problem vanishes and the moves respond seamlessly, but gamers who can't spring for a joystick will have a hard time.

Graphically, this version

**PROTIP:** Diablo torches his defeated foe with the Fireball fatality: Hold High Fierce, Low Quick, and Low Fierce, then tap Toward five times.

**PROTIP:** Take advantage of Talon's lightning speed by jumping in for quick combos, then leaping away.

**PROTIP:** Polist off your opponent with Blizzard's Brain Bash fatality: Hold High Quick, High Fierce, and Low Fierce, then tap Down and motion Down, Away, Up, Toward.

puts on a decent but not flashy show. The backgrounds and dinos pop with color, and you'll recognize everything from the arcade. The sprites, however, are a tad too small, and their movements stutter slightly—the SNES version definitely looks better.

**PROTIP:** Chaos's Fart of Fury (hold High Fierce and Low Quick, then tap Down, Toward, Up, Away) dizzies opponents, so follow it with your best combo.

The sounds lack the spine-rattling bass boom of the arcade, but the effects and music perform well for a home conversion. The smacks and cracks of combat definitely keep the pace lively.

### Primal Conquers

With an impressive list of options and a widely adjustable challenge, this strong conversion of the arcade dino basher will engross fighting fans despite its few shortcomings. Rage! **B**

### Lord of the Sword

Weaponlord's controls are exceptional. The characters are extremely agile, and each one pulls at least nine special moves. With practice, you can chain the special moves together into intense combos. Also, the thrust-block feature enables you to anticipate an opponent's attack and activate a defensive block that opens them up for a counter.

If WeaponLord's blade has a dull spot, it's that it offers only seven playable characters and no hidden ones. At least you can work toward some multiple endings in the Story mode.

While the advanced game play may scare away beginning barbarians, others will appreciate the deep controls. If you're a hardcore fighting fan, chances are you'll dig **WeaponLord**.

Super NES

By Scary Larry

Killer has finally come home! Home to the 16-bit SNES, that is. This version of Killer isn't flawless, but it is surprisingly addictive and fun to play.

## Natural Born Killer

In a bleak and desolate future, one corporation reigns supreme: Ultratech. Makers of advanced weaponry, they are also the sponsors of the top-rated Killer Instinct TV show, in which warriors from all walks (and crawls) of life compete for the right to call themselves the best...and to be granted anything their hearts' desire. The ten warriors slated for this version have many different desires. Some want fame and for-

tune, others want respect...but all want to pound their enemies into submission.

The range of fighters, from an alien life form to a disgraced heavyweight boxer to Ultratech's deadliest robot, possess their own brand of brawling. Some use fists and feet, some use projectiles and claws, while others teleport, slide, and change form to win the battle. There won't be a dull moment during the bouts.

This unique fighting game works on a very fast, very simple, and quite effective combo system. Instead of your normal one-button, one-hit fighting style, you sometimes chain together 3 to 21 hits in a few button presses. While this style of combos is not for everyone and may irk

fighting purists, it's certainly entertaining and fun to watch...the first time.

But ultimately, you end up doing a lot of watching. What fun is it to stand by and watch another player of advanced skill whip you until you scream "Uncle!"? Although moves called Combo Breakers enable you to break free from this barrage of beastly brutality, they don't work all the time.

Adding further to the humiliation are...humiliations. Humiliations are embarrassing moves that totally disgrace your opponent by, for example, farting on them, exposing yourself to them, or otherwise robbing them of their dignity. The many other finishing moves will also do the job of making your enemy feel like a putz.

## Basic Instinct

Although the arcade version broke ground with its rendered

**PROTIP:** *Solymwolf's Howl (top ↘, ↓, ←, Fierce Kick) is more than an auditory warning: It enhances his strength. Howling then hitting has dangerous results for your opponent.*

combatants, don't expect anything close to that here. The graphics are good - but not great - with lots of choppy movement and missing frames of animation.

The backgrounds are nowhere near the quality of the arcade version, and some of the better background effects, like knocking enemies off the high-rise and onto the roof of a parked car on the street below, were taken out. The scaling in and out of the stages that appeared in the arcade is absent as well.

The sounds vary between okay and awful. Some fighter's sounds are intact, like Sabrewulf's howling and whim-

## Super NES

By Scary Larry

Finally, this monstrous fighting game has made it from the arcades to your homes. If the thought of some carnivorous cranium crunching makes your heart pop (and it will), this game is for you.

### All the Rage

Once upon a time, long before Bedrock had indoor plumbing, dinosaurs ruled the Earth. They were gods that represented life and death, good and evil, insanity and decay, hunger and survival. A magician named Balsafas saw the threat these beasts posed, and entombed one. The others went into hiding, and millions of years later, after man had his shot at the planet, the encased dino escaped. Now the prehistoric gods once

again rule the planet.

You play as one of seven skin-ripping fighters, each with its own unique fighting style. Some half-breed DNA disasters, like Vertigo, can hypnotize and spit acid, while others, like the steel-plated Armadon, rely mostly on punches and kicks to finish the best two-of-

three round matches. Human worshippers also run around in each match, but they serve mostly as snack food to replenish a dino's health. It's all exactly like the arcade version, albeit with smaller sprites.

The game has a basic combo system, and multi-hit combos are registered on the side of the screen. Combos rely mostly on left button pressing, since only four buttons are required to execute them. Simple controls

**PROTIP:** Sauron's strength is his unsuspecting air throw (Button 2 and Button 4 when in the air). Use it when enemies try to come in with flying moves, such as Armadon's Iron Maiden.

make this game easy to learn and fun to play.

### Primal Screen

Purists looking for the arcade version's heart-stopping graphics will be somewhat disappointed. Although this version is a lot better-looking than the Genesis version, the graphics are not as crystal clear as they should be. The fighters lose some detail and their colors are murky. The backgrounds, though, are well done and imaginative, from fiery lava ruins to an abandoned city.

**PROTIP:** Use Armadon's Spinning Death to quickly get across the screen or to pass under a jumping foe.

**PROTIP:** Beware of teleporting with Vertigo. She's vulnerable when she comes up.

**PROTIP:** When Armadon goes into his Bed-O-Nails, he's susceptible to a low hit.

**PROTIP:** To do a good four-hit combo using Armadon, jump in with Button 1, then hit Button 2, and rapidly alternate between Buttons 1 and 2 as you land.

The sounds excel in the SNES version. Each roar, fart, and skin-ripping sound effect is right on target. The music is hokey, but it doesn't impair the action.

### A Rage to the Finish

Primal Rage is an imaginative concept, but the sluggish gameplay and less-than-spectacular graphics don't give this game the roar that Killer Instinct or Virtua Fighter possess. Still, this dino has teeth. **C**

Just when standard one-on-one fighting games seemingly faced extinction, WeaponLord arises from the ashes of the home video game genre – but not without a few faults.

### Re-Inventing the Fight

WeaponLord has no simple fireball motions, no cheesy corner traps, and no half-life air juggles. Its complicated moves re-invent fighting-

tons, then executing motions on the directional pad. While the controls are responsive enough, mastering this unique play engine requires patience and practice. Once you're familiar with it, though, you can execute some pretty wicked combos.

A unique system of blocking enables you to knock down an opponent's guard and even block in the air. The former is particularly arresting because it constantly puts players on the offensive.

The game also has its own variety of finishing moves that require more than simply pressing a series of buttons and letting the computer do the rest. Finishing moves depend entirely on the skill of the player, who must combo into a special move in the final moments of the last round, which then triggers the finishing move. Flashy players can decapitate their opponent, and if they're good enough, bat the severed head around.

### Bloody Fun

Three play modes – Story, Arcade, and Versus – heat up the action. The first two are

**PROTIP:** For Jen-Tai to decapitate an opponent with a finishing move, simply perform her Down Strike (hold R or X, tap ↑, ↑, ↓) after the enemy has fallen.

game controls. Even the throws require more than being close to your opponent and pressing one button.

Instead of solely using the standard motion-then-button routine, WeaponLord's system involves holding down but-

**PROTIP:** For a quick two-hit combo, do Jen-Tai's Leg Breaker and immediately follow it with a Down Strike.

for one player; however, the game really shines in the two-player Versus mode, where the exciting matches are long and grueling.

The graphics are colorful: Sparks fly when weapons clash, and blood flows freely. There are humorous visuals, too – like cutting off Korr's long ponytail. The backgrounds are also well done, but some of the background elements suffer from choppy animation.

The audio accompaniments, from the clanging of rugged metal to the slicing of tender flesh, are fitting. However, the music on some stages sounds heavy handed and operatic.

### The Final Cut

Some gamers may be put off by WeaponLord's complexity, and it's surely not for the squeamish. But WeaponLord's multitiered fighting cuts a notch above the rest of the recent pack. **B**

The sounds and graphics are both above average. The sounds are especially effective with moody, atmospheric music and distant gunfire that warns you of impending action. The squashed graphics, though colorful, don't always help you in your detailed quest. That tiny radar screen looks like a postage stamp on your TV.

Young gamers or those with little patience should stay away because Syndicate isn't easy. But advanced gamers and fans of the computer versions will get a satisfying bang out of the SNES cart. Syndicate is a thinking man's shoot-em-up game. **G**

pretty unimaginative, the enemies are silly, and the kats are slowly moving heroes.

For diversity, one world presents behind-the-aircraft shooter action against a weird sea creature, but the novelty soon wears off. The whole game plays like something that would've been released a couple of years ago, and even then its FunFactor would've been average.

weapons with more available the longer you survive. But the basic weapons' limited range will frustrate most gamers.

The youngest gamers might like SWATKats, but anybody older who's played a decent SNES game in the last two years will see why 16-bit games are on the way out. Primitive game-play puts these kats on the endangered species list. **G**

This just in from Bizzarrnia state radio. "Attention, people of Bizzarrnia. The government has fallen...and that means you can win cash and valuable prizes on the all-new, all-capitalist People's Game Show!"

Zhadnost: The People's Party is a wacky 3DO TV-style gameshow set in Bizzarrnia, an Eastern Block country recently freed from a repressive but goofy communist regime. The result is a sometimes hilarious tour de farce.

**Zhadnost! Somebody bring back communism!**

### Commies for Comedy

Zhadnost's graphics and sounds are a blast. The game-show set features an outlandish high-tech design, and the costumed actors stage outrageously visual performances. Obscure film clips from the '40s, '50s, and '60s add weird, comedic flair.

The audio tickles the funny bone, too. The announcer and show hosts are over the top, as you'd expect. Likewise, the five contestants serve up fun-loving vocal stereotypes, from a secret police interrogator to a wise-guy hoodlum. The music runs wild with a catchy, retro-punk, electric-guitar-and-drums homage to the Ventures.

Jaguar

By Tommy Glide

The wait is over for Jaguar owners yearning for a long, involved platform hopper! Rayman is animated thumb candy for those in need.

## Dynamite Zool

Resembling a cross between Zool and Dynamite Headdy, Rayman's Muppet-like world begs exploration. Mr. Dark has stolen the ProToon – the power source for the planet. As Rayman, you must free Dark's hostages (who are found in cages dispersed throughout the levels) and ultimately regain the ProToon.

Although Rayman involves standard hop-n-bop action complete with boss characters, diverse interactive elements add to the Control and FunFactor ratings. As you successfully progress through levels, a fairy grants you new moves. After the first two stages, you receive a basic attack punch. A few levels later, you get to hang from ledges.

## Sugar Rayman

Rayman's cartoony, colorful graphics and detailed back-

**PROTIP:** Use your punch to knock the purple berries onto your enemies' heads. Then stand on their heads and jump to reach power-ups.

**PROTIP:** Don't rush to the top of the screen to escape the rising water. Instead, move quickly and plant the flowers necessary to escape, then concentrate on jumping to the next platform.

**PROTIP:** Time your jumps to avoid the giants' arms.

**PROTIP:** When you're on the hornet's back, move quickly and stay close to the top and bottom to avoid enemies. Always take the health power-ups, or you won't make it.

**PROTIP:** Watch for the hornet's stinger as he zooms in from both sides of the screen. Punch him when he hovers.

**PROTIP:** On the first level, climb the first set of vines and move to the left. You'll find a platform with a 1-up.

**PROTIP:** When you ride these wheels, stay on the top so you can jump to avoid approaching obstacles.

grounds showcase the next-generation quality you expected all along from Jaguar games. Rayman stands large on the screen, and his many enemies have similar animations. The graphics are deceiving – Rayman looks like a game for kids, but in reality, it plays much harder.

The sound keeps pace with the graphics. You get authentic sound effects (like the splash of objects landing in water), along with the standard beeps and thumps associated with platform games. However, the upbeat soundtrack could be from any cute Saturday-morning cartoon.

## The Jaguar Smiles

Rayman's controls are precise. Your hero is extremely agile and needs to be, considering the constant jumping, ducking, and dodging that's required. You may find advancing through one area requires hours of attempts because only an exact move pattern will get you through safely.

With plenty of power-ups and hidden bonus games, anyone looking for deep gameplay along the lines of Donkey Kong Country or Gex won't be disappointed.

Although his puppetlike image leaves something to be desired for older gamers, Rayman is good platform fun – a ray of sunshine for Jaguar owners. **C**

Jaguar

# AIRCARS

By Tommy Glavin

If you do the math, you'll find it's wrong because Aircars for the 64-bit Jaguar looks like a bad 16-bit tank game. What happened to the other 48 bits?

## Sci-Fi Fly-By

From your cockpit, you pilot an aircar (a heavily armed futuristic hovercraft) against an army of scientists bent on world domination. Through 32 missions, you seek and destroy targets, eliminate enemies, and collect power-ups. You can also switch views and weapons, drop smoke screens and mines, and use

your map to search out targets. Each level is set in a large region with plenty of enemy aircars and tanks to annoy you. You can also find teleport gates that warp you to different areas of the level.

## Poly-Goner

This polygon world is visually boring. An occasional tree is the only detail in the dismally sparse surroundings. While smooth scrolling and rolling terrain make for more realistic gameplay, the bland enemy targets and background scenery make this game a graphical dud.

The sound is below average with the exception of decent explosions. A helpful voice will occasionally chime in when you destroy something important. But aside from the title screen, you don't get any music.

For all its problems, Aircars offers good control. Multiple evasive movements and easy access to weapons make the game bearable.

While Aircars can be played with up to eight pilots (using the CatBox network), the game isn't any more fun with multiple players than it is alone. Similar to (but below the par of) the PC title Spectre, this substandard shooter will only satisfy easy-as-pie players.

# Power Drive Rally

for this lame driving game? Driving a Hyundai looks more attractive than this game.

## Powerless

Four-wheeling never looked so boring. In Power Drive Rally, you pick from a Fiat or a Mini, two decidedly European-looking cars that don't exactly inspire respect in the hearts of racing fans. Between races, you spend your winnings on

**PROTIP:** Swing wide on turns to snag power-ups.

new engines, suspension, tires, brakes, and so on.

The controls are squiggly and slow. Even when powered up, your car putters into curves and goes off the track at the slightest resistance. Then again, you may find yourself ditching your car out of sheer embarrassment.

## The Agony of De Fiat

The graphics aren't too bad. You traverse over African swamp land, English forests, and more. Although the race courses are well defined and certain effects (like lightning and rain) are well done, you get the overall feeling that this game is a bad Micro Machines rip-off.

The sound is just a little too much. Funky European music is complemented by an annoying British voice that calmly gives you directions. It's like riding with your dad, and the announcer sounds like he'd be more at home calling a tennis match.

Jaguar owners will be disappointed if they're looking for a racing game to rival Daytona or Ridge Racer. Without any power or graphical wizardry, this game doesn't rally to the occasion. **C**

**PROTIP:** Stay in the middle of the course to avoid colliding with obstacles along the sides, like fallen tree branches.

**PROTIP:** The arrows that point backward on the Skills tracks indicate that you should back the car into the space.

Those time-traveling warriors return for a fourth round, achieving the best World Heroes game yet. Alas, WH Perfect is an upgrade (like another popular fighting series you know), correcting most of the elements that were amiss in the last installment. That, along with a few new moves, makes this World Heroes almost perfect.

### Not Quite Perfect

The most noticeable change is the new four-button layout, similar to that of Samurai

Shodown (two punches, two kicks; press both punches or both kicks for a strong blow). This arrangement adds new range to the power behind special moves – before, there were only two buttons, and holding a button longer increased the power of the blow.

You can also block while in the air. The moves are still easy to execute, thanks to very responsive controls, but multihitting combos exact more

# WORLD HEROES PERFECT

An old foe returns for the final showdown.

There's even a hidden fighter – get ready for Goku!

PROTIP: Rasputin's ABC attack will make you a very small problem – literally.

PROTIP: You can vary the range of the Crazy Death Blow depending on how long you keep the buttons pressed down.

PROTIP: You can only perform the Crazy Death Blow when your life bar is flashing red. Do it with a maxed-out Hero bar for some serious damage.

PROTIP: To perform Janne's Crazy Death Blow, motion ↓ ↘ ← ↗ → (B C D).

Sixteen mighty warriors battle again!

Jack's cheesy Mixer Crunch no longer has unlimited range. Unfortunately, the same can't be said for Capt. Kidd, who is still too powerful – especially with his damaging Spinal Kick.

### New Backgrounds

WHP looks and sounds great. The backgrounds are beautiful, but some of the activity looks choppy. The well-animated characters sport some knock-out visuals on the Crazy Death Blows and special moves.

Each stage has its own musical flavor, from intense (the volcanic lava) to subtle (the ice cave). The sound effects, such as Janne's clanking Slash Whip and Rasputin's crackling Ice Ball, are awesome.

### World Heroes... Almost Perfect

World Heroes Perfect almost lives up to its title. Those of you still reeling from Jet will find a very fun fight here, lumps and all. **C**

## 3DO Scores with Slam 'N Jam '95

### Slam 'N Jam '95

3DO

By Super Dizzy Jet

There's plenty of slammin' and jammin' in 3DO's full-court press, Slam 'N Jam '95. For a basketball game without "NBA" in the title, that is.

#### Backboard Jungle

Slam provides enough high-speed action to keep b-ball fans content with a game that looks different but doesn't necessarily play differently. With plenty of variations on dunking (including 360-degree spin dunks and rim hangs), the game-play is fast and furious enough.

The action starts with three play modes — Exhibition, Season, and Playoffs — and several other play options, such as eliminating boundaries and setting the time

**PROTIP:** To fake out opponents, go for a jump shot, then pass off to a teammate at the last second.

**PROTIP:** Keep track of your players' stamina. If it drops too low, bench them to replenish it.

for the quarters. For all-out play in the spirit of the game's title, you can even adjust the fouls from strict to nonexistent. A slow-motion feature perfectly replays stretches of action right down to the sounds.

#### Zoom, Zoom, a Zoom

Graphically, Slam offers a behind-the-backboard perspective, rather than the familiar side view. It zooms in for all the important action (baskets and so on), but for continuous motion, it occasion-

**PROTIP:** To check out the strengths and weaknesses of each team, play the Exhibition mode.

ally stops to process the next bit of action. With all the zooms, there is minimal pixelization — even when the players and the ball receive tight close-ups.

The audio is a different matter: The cheering crowd abruptly dies down, then suddenly starts up again. Commentator Van Earl Wright provides colorful, humorous expressions, but the one-liners quickly grow repetitive. Fortunately, an option lets you shut him up for the duration of the game. Sneaker squeaks, grunts,

**PROTIP:** For uninterrupted play, turn off the boundaries.

**PROTIP:** Slam the ball enough times, and the backboard will shatter.

**PROTIP:** Use full-court shots only as a last resort — they rarely go in.

and the ever-present dribbling ball are intelligibly reproduced.

#### He Shoots, He Scores

Like many full-team sports games, Slam 'N Jam gets bogged down when you try to switch to various teammates while on the court. Cycling through several players until you reach the one you want gets frustrating and ultimately delays your responses. Otherwise, passing and shooting are no problem.

Despite minor annoyances like the commentary and player switching, Slam 'N Jam '95 is a lot of fun — even without the blessing of the NBA and its shoe-endorsing players. This hoop shooter will tide 3DO sports fans over — at least until the '96 edition. **B**

RHI Roller  
Hockey '95

Super

By Air Hendrix

RHI Roller Hockey '95 blades into the crowded hockey arena with a refreshing blast of speedy action. Even though it looks just like ice hockey, RHI's raucous gameplay and unique rules will rouse your interest in hockey's summer cousin.

## All-Star Action

Hockey pros will need a brief moment to master the nuances of roller hockey, a sport that's recently organized into a league with a summer season. Five-player

teams (including the goalie) strap on in-line roller skates and play four-period games on cement rinks. Although there are no blue lines, offside is called if a player precedes the puck over the center line.

These minor differences aside, standard hockey features provide a firm base for the action. Pick from all 24 Roller Hockey International (RHI) league teams and two all-star teams with real team and player names, then

The strong lineup of offensive moves includes one-timers, fake shots, and drop passes. Strategy-oriented players, however, will find

**PROTIP:** Position a defenseman between a shot and the goalie so he blocks the shot with his body.

## Visual Assist

Graphically, you can't make out any in-line skates, and the arena looks just like an ice rink—it's puzzling that no gameplay details remind you that you're playing

**PROTIP:** As soon as your offense controls the puck, use the speed burst to create breakaways.

## Breakaway!

The responsive controls let you wade through the competition, though the awkward double-button taps for fake shots strand you at times. The speed burst and

that the dim-witted CPU players don't provide enough tactical support for a thinking game.

The game's blazing pace, however, makes for intense action. Players and rebounding pucks move with wicked speed, and the checking-based defense adds rough-n-tumble excitement.

**PROTIP:** When you're one-on-one against the goalie, quickly fake to his glove side, then fire off a high shot on his stick side.

Use the coaching feature to fine-tune your team's abilities before each period.

roller hockey. The well-drawn sprites, though tiny, move with realistic grace.

Unfortunately, the perspective scrolls too tightly with the action. When a rebound rockets off the goalie's pads, the perspective jarringly rockets after it, momentarily disorienting you. With time, though, the jerkiness becomes less distracting

wrist shot are located on separate buttons; this innovative placement enables you to sprint like a madman on breakaways.

A clear-sounding, lively announcer paces the action, and the decent crowd and puck noises overcome the muffled grunts. With such fast-paced gameplay and generally strong features, hockey vets will relish RHI's change of pace. **G**

# RBI '95 Goes Deep On the 32X

RBI Baseball '95

32X

By Quick-Draw McGraw

Instead of releasing a '95 version for the Genesis, Time Warner put RBI '95 at bat on the 32X, and it knocks one out of the park!

give you every current team with MLBPA-endorsed rosters and stats, but it also includes every division winner dating back to '86 and every All-Stars team back to '90. You can even create your own team of stars from different years.

Play an Exhibition game against a ramped-up computer opponent or guide your team through a regular season, Play-offs, and World Series. Want more? How about Home Run Derby, Defensive Practice, and Game Breakers (lets you replay tough situations) modes.

RBI's controls are better than ever. Fielders jump and dive with great accuracy, and base runners perform well. Few ball sims let you control a pitch while it's in the air, but you can here, and the hitting is smooth as well.

## Base Ace

Known for its cartoony graphics, RBI finally grows up. A new up-close batter's-box view gives you a large sprite and a detailed view

Although RBI's music can be a bit annoying at times, the sounds are a big part of the game. Between the play-by-play guy, the ump, and the crowd, there's rarely a

moment of silence.

In what appears to be an intelligent mix of the two best baseball games around, RBI and World Series, you get action-packed ball for the 32X. **G**

## Grander Slam

Strikingly improved from HardBall '94, the dazzling graphics

make for beautiful baseball. The smooth but slightly slow sprites move realistically in both the standard batting view and the TV-like pitching perspective. Although the players seem too small when you're fielding, the gorgeous stadiums, rendered from the real parks, are a feast for the eyes.

With an in-depth system of season play, HardBall '95 trails only slightly behind the frontrunner, World Series '95. Nonetheless, this strong card will keep you swinging away under the warm summer sun. **G**

# Head-On Soccer Speeds past Slower 16-Bit Sims

## Head-On Soccer

Super NES

By Tommy Glide

Oooh-rah! Head-On Soccer for the SNES is aptly named because you'll dive right into this turbo-charged game.

### Ball Brawl

A total of 51 international teams take the Exhibition or Tournament field in this game. There's no FIFA or World Cup endorsement, which is fine because Head-On is more like an arcade

PROTIP: Get the advantage in exhibition matches with Brazil. Each of the 11 characters are star players.

soccer game than a simulation. It's quicker than most soccer

PROTIP: Position the ball for a shot by the star player "Striker 2." His blazing shots immensely increase your chance of scoring.

games and definitely more physical: While referees patrol the action, they're somewhat lax in calling penalties.

Because these teams aren't bound by World Cup regulations, the game includes "star players" who possess special skills that exaggerate standard soccer moves. Star forwards burn the ball with blazing hard shots, star mid-fielders maneuver beautifully, and star

fullbacks deliver devastating defensive moves.

Head-On nails the controls with a six-button interface, providing separate buttons for heading the ball and for the star players' special moves. Getting off quick passes is easy, and slide-tackling your opponents is just as simple.

### Goalie Cow

The graphics for Head-On are dead on. The stadium is well detailed, and the field view gives you

PROTIP: When on defense, press Button Y to punish your opponent with a kick that will put them out of the play. But don't kick them again when they're down, or you'll draw a yellow card.

good depth for passing. The characters move well and are better defined here than on the Genesis.

Like the graphics, the sound is slightly better here. Heavy crowd noise, authentic whistles, and good booting noises highlight the effects. The music is limited, and a mechanical announcer calls the penalties and throw-ins.

Implementing the star players' special moves really juices up the action. If other soccer sims seem slow to you, this fast and furious version of the sport may keep you coming back for more. **G**

Put down the controller if you haven't fueled up with a good nutritious breakfast! You'll need all your strength to keep up with the accelerated action of Head-On Soccer.

### Rock 'Em Sock 'Em Soccer

Not the gentleman's game of soccer, Head-On enables you (and the CPU) to bang away at your opponents as much as the ball. Head-On is a soccer "game," not

PROTIP: The "Tricky" star player with the deadlocks has a special move to hop past defensive players while maintaining ball control. Master this move, and you can run the ball downfield and almost into the opponent's net.

(in order to earn a free kick), and well-controlled shots.

### Keep Your Shin Up

Graphically the game looks a little

better than average. A nice view of the field makes passing easier, but the cinemas (for a foul or goal) are a little corny. The sprites are average sized for a soccer sim and are decently animated.

The sounds are also slightly above par. The crowd chants, the an-

nouncer shouts "Goal!", and you get a good smacking effect when your man kicks the opposing player in the shins.

The control is good, and the Genesis game seems to play a little faster than the SNES version. If you aren't looking for stats and standings on the real international teams, this game of "street" soccer might be right up your alley. **G**

PROTIP: If you have a star player, press Button C to use him to cross shots in front of the net.

a sports sim—some of the realism has been removed to make way for a better (faster) gaming experience.

PROTIP: Quick passes up the center will usually get the ball to your forwards, even though you may not be able to see them onscreen.

Each of 51 international teams boast "star players." In the Tournament mode, you have to earn star players, while in the Exhibition mode, you begin with the maximum star players allowed. Star players have special offensive and defensive moves, like highly accurate passing, fake falls

## CHRONO TRIGGER

By Sir Scary Larry

Square Soft, the company that brought you Final Fantasy and Secret of Mana, has a new RPG. Chrono Trigger more than lives up to Square's legacy of fantastic role-playing adventures!

### Time Traveler

In Chrono Trigger's complex story line, you play as Crono, an unsuspecting lad who happens upon a princess in peril. Crono travels back and forth through time from 65 million B.C. to 2300 A.D. in search of the evil Lavos, who has planted the seeds of destruction that will ultimately destroy humankind in the year 1999.

But you don't go into that

**PROTIP:** Visit Melchior the swordsmith and buy a better sword before you head out.

### CHRONO BEAUTY

**PROTIP:** One of the most important items to buy is the Shelter. This allows you to fully regain your MP and HP when you find a resting spot. Also, stock up on Heal and Tonic.

dark night alone. During your adventures, you team up with a princess, an inventor, a knightly frog, a robot, and a cavewoman. With these adventurers accompanying you, the road ahead doesn't seem so long and hard.

And maybe it's because the road isn't that long or hard. Although the game does contain all the elements of standard Square RPGs (extensive conversations, weapon collecting, treasure hunting, problem solving, and tons of humor), the gameplay is geared more toward the charge-your-sword-before-you-attack style of Secret of Mana than the straight spell/combat system of FF III.

Besides the standard sword-swinging, there are Tech attacks and magic. Even more interestingly, Combo Tech techniques let you and other members of your party combine for double- and even triple-whammy attacks on your enemies.

### Knight and Day

As for variety, there's plenty in Chrono Trigger, including ten endings. At one point, you even race on futuristic motorcycles. (And you select the race perspective!)

In an improvement over other RPGs, you can play the entire game a second or third time with your previously built-up character, which

**PROTIP:** When using Tech attacks like the Cyclone, target the middle enemy in a group. This assures that you'll take out more than one enemy.

**PROTIP:** Check the old Guardia castle carefully, especially the rooms of the chancellor and queen. You should find a Bronze Mail suit and Ether, which restore your MPs.

makes the repeat trip much faster. And the great humor in this game runs from the obvious to the sublime – including references to other Square games like FF III.

bat doesn't occur randomly in Chrono Trigger. You see your enemies approaching and can easily side-step them. But enemies do reappear after your initial battle, so when you enter a room and fight the foes guarding the door, you may have to fight them again on the way out.

Similarly, Trigger's control is relegated to a simple menu system. Although other games certainly have better menu systems and weapon-equipment options, Trigger's is easy to learn. One caveat: Be careful when you buy weapons. There's no way to tell if a weapon is more powerful than the one equipped until you actually buy it and equip it.

The good news is that none of these minor complaints in any way lessen the fun of Chrono Trigger. Most players would choose an easier RPG of this caliber over a hundred more complicated, but less developed, fantasy role-playing adventures.

## Looks Could Kill

those in previous RPGs, including FF III. Expect to see innovative enemies, hypnotic special effects (especially while you time travel), impressive Tech spells, and gorgeous, lush backgrounds. When you escape from the Guardia prison, take time to stop and admire the detailed skyline – that is, if you can keep far enough ahead of the cadre of troops on your butt!

From the cries of sea birds during the opening sequence to the moody, captivating theme music, the sounds are equally spectacular. The effects are packed with incredible detail, including the contented meow of cats. And nothing is more satisfying than hearing a prison gate open or the hearty clash of metal on shields.

## Trigger Happy

Chrono Trigger is another satisfying and superlative game from Square. If you've finished FF III and are itching for some fantasy field work, pick this one up. Thankfully, the fantasy isn't final yet. **C**

# SECRET OF THE STARS

**SUPER NES**

## By Fried Eye

The secret of Secret of the Stars is that it's harder than it appears. Its kiddie characters and an easy-to-use RPG design will appeal to young beginners, but the epic-length adventure and multitude of monsters will challenge wily RPG vets.

## The Secret's Out

You play that famous boy hero Ray, who must vanquish an evil duke named Homnucruise (no relation to Tom). Secret isn't as complex as Final Fantasy, but you're in it for the long haul if you want to see the conclusion.

## Magic Point by Point

Secret's gameplay is pretty much McRPG...that is, you can get it fast, and it's relatively easy to digest. Standard RPG stuff includes moving two parties across a terrain map, interrogating characters, and hunt-

**Standard compact, cartoony RPG characters lead this adventure.**

ing monsters for experience points, magic points, and gold.

Of course, monster mashing is the primary way to amass various points, discover spells, and build an adventurer's inventory. Secret's seriously overrun with monsters, sort of an *X-Files* with a sense of humor. At first, there are a lot of goofy goons with names like Cat Boo and Badbad the Vampire, but later the creatures get tough.

The solid, turn-based combat system helps you hold

**PROTIP:** The Star Temples max out HP and MP.

**PROTIP:** Don't let the loincloth fool you. It's stronger than chainmail.

**PROTIP:** To beat the Ringo Brothers, concentrate your attack on Bingo. Use Magic. When he's defeated, attack Leach.

**PROTIP:** It may get crowded, but your party can restore hit points by hopping into a bed. Inns restore all HP and MP for gold.

**PROTIP:** You must find Morgan in Giant. He likes to dig, so check out this hole in the northeast corner of town.

combining the various spells of party members.

## Seeing Stars

The simple graphics get the job done. The character sprites are typically sugary and squashed. However, the combat screens depict the wide variety of monsters in impressive detail with picturesque backgrounds.

Soundwise, this ain't MTV. The typically flutesy cutesy music continually threatens to drive you batty, and the effects are nearly nonexistent.

Stars shines as a solidly crafted and fun RPG for all skill levels. Secret's out, pass the word. **G**

**PROTIP:** To beat Golan the Giant, you need the Graviton. Professor Dynamite in Decatas can make one, but find Morgan first.

## Kick Some Asteroids

This cart offers two primitive shooters, Asteroids and Missile Command. The games have the same premise: Nail incoming targets. Asteroids can be played either with Atari's original wire-frame graphics, or with an updated look that gives texture to your ship and the drifting asteroids. Missile Command is what you old-timers played in 1981.

The uncomplicated controls are so straightforward you won't need a manual. Asteroids has its familiar thrust/hyper/fire abilities,

**PROTIP:** Don't blow up big asteroids that are right in front of you because you may not be able to dodge their debris.

**PROTIP:** When incoming missiles start arriving faster, keep your cursor low so you can take out several at a time.

Super Game Boy Super

while Missile Command enables you to fire from either corner. Everything's very efficient, but the limited firepower will seem slow and archaic compared to the multi-weapon found in today's best handheld games.

## Arcade True

Like the gameplay, the sounds and graphics are throwbacks. If you're feeling nostalgic, you'll

smile at the pings and zaps from the old arcade games.

The graphics receive special borders for the Super Game Boy, but nothing else has improved with age. Asteroids' shots are still the size of atoms, and Missile Command cities have few details.

Most players won't care about the minimalist style of these two classic games. They'll only care about the pure fun and the great value. Two time machines for \$30? Now that's entertainment.

By Greasy Gus

Yeeeessss! Return to the past for some good old-fashioned bug-blasting with this two-in-one Super Game Boy cart featuring Centipede and Millipede.

## Segmented Shooters

From the arcade that time forgot, these two classic shooters have been replicated accurately on the Super Game Boy. Centipede precedes Millipede and is the more basic of the two, while the sequel adds more crawling critters and extras like DDT bombs.

Amid a field of mushrooms, you must maneuver your spaceship and blast many rapidly descending bugs. Bragging rights go to those who survive the most

**PROTIP:** Shoot the DDT as the Millipede nears it, and you have a good chance of destroying most of him.

levels of endless attacks.

Graphically, these games fare well by Game Boy standards, though Centipede resembles the Atari 2600 version more than the arcade game. Super Game Boy colors don't add much except cool borders designed to look like the original arcade machines.

Like the graphics, the sound captures much of the flavor of the original games. Although some effects (like the blasting sound in Centipede) could have been cleaner, the majority of the sounds will wash over you in a wave of nostalgia.

# Centipede/Millipede

**PROTIP:** To quickly destroy centipedes, rapidly shoot them as they appear at the edge.

**PROTIP:** Moving easily throughout the lower part of the screen is key to survival. Shoot any mushrooms that appear within your range of motion.

## Mushroom Doom

The game's very basic controls make navigating your ship and firing pretty easy to accomplish. The overall gameplay, however, feels slower than the original versions.

While they're not much to look at compared to newer titles, fans of these classics will appreciate being able to play both games with the same cart. These are still two of the finest mindless games on memory lane.

**KILLING TIME.** What a politically correct title, eh? You're trapped in a horrifying 3D world of the undead. But lucky you. You've brought along some serious firepower. You've got to shoot first and catch your breath later. To solve this mystery, listen to the ghosts for clues. You'll have to call on your wits, call on your weapons or call for an organ donor if things go south. **Features:** 16 horrific enemies (only 3DO could get 7 genuine ghosts on videolope), 45 supernatural areas to discover and over 200 rooms to explore. Requires use of the head, if it hasn't been blown off already.

# ready to *Rage?*

Read on for special moves, finishing moves, wild combos you can sink your teeth into, and techniques for properly digesting humans.

By Bruised Lee

Welcome to the new Urth. The gods are awake – and angry. The blood-bursting, bone-crushing arcade hit *Primal Rage* is ready for the SNES and Genesis with all seven ferocious fighters and all of their special moves, finishing moves, and combos. This strategy guide breaks down each character in the game and covers some fighting basics and devastating combos.

## The Controls

Each character's special moves, finishing moves, and combos are performed identically on both the SNES and Genesis versions. Refer to the controller legend for the version you have.

## Basic and Power Moves

In general, each character has four basic moves (High Quick, High Fierce, Low Quick, and Low Fierce) and two power moves that are performed when the two high moves or the two low moves are pressed simultaneously. Power moves are effective when a character is in close, crouching, or jumping.

**High Quick**

**High Fierce**

Tap HF

**High Power**

Tap (HQ HF)

**Low Quick**

Tap LQ

**Low Fierce**

Tap LF

**Low Power**

Tap (LQ LF)

### Genesis Controller Legend

Button A = Low Quick (LQ)  
Button B = Low Fierce (LF)  
Button X = High Quick (HQ)  
Button Y = High Fierce (HF)

↑ = Up

↗ = Up-Toward

→ = Toward

↘ = Down-Toward

↓ = Down

↖ = Down-Away

← = Away

↙ = Up-Away

Motion = Move the joystick in one smooth, continuous motion.

Tap = Tap the directions and buttons indicated in sequence.

Charge = Hold the direction or button indicated for the time indicated.

( ) = Execute commands in parentheses simultaneously.

**Special Note:** All techniques are described under the assumption that your character is facing to the right. If they're facing left, reverse any Toward and Away commands.

### Super NES Controller Legend

Button B = Low Quick (LQ)

Button A = Low Fierce (LF)

Button Y = High Quick (HQ)

Button X = High Fierce (HF)

**PROTIP:** For all the cheats, combos, tips, and techniques you need to dominate the new Urth, get The Primal Rage Official Player's Guide by calling 415/361-0310.

# PRIMAL RAGE

## Stand Up Strategy

These basic tactics help each fighter to their feet with a vengeance after they're knocked down by a move or a combo. Perform each move as the dino is getting up.

### Armadon

*In Close*

Hold (HQ HF LQ) and tap →, ← to Gut Gouge the opponent.

### Blizzard

*In Close*

Tap (↓ LQ LF) to Power Sweep the enemy.

### Chaos

*In Close*

Hold (HF LF) and tap →, ← to go into a Grab-N-Throw.

### Diablo

*In Close*

Hold (HF LQ LF) and tap ↑ to go into an Inferno Flash.

### Sauron

*In Close*

Hold (HF LF) and tap →, ← to do a Neck Throw.

*Far Away*

Hold (HF LF) and tap ←, ↑ to shoot Flying Spikes.

*In Close*

Hold (HQ LF) and motion → ↘ ↙ ← ↗ ↑ to launch the Punching Bag.

*Far Away*

Hold (HQ LF) and tap ↑, → to perform a Fast Power Puke.

*Far Away*

Hold (HQ LQ) and tap ↓, → to launch Fireballs from a distance at the enemy.

*Far Away*

Hold (HQ LQ) and tap ←, → to do a Stun Roar.

### Talon

*In Close*

Hold (HF LF) and tap ↓, → to go directly into the Face Ripper.

### Vertigo

*In Close*

Hold (HF LQ) and tap ←, → to perform the Voodoo Spell.

*Far Away*

Hold (HQ LF) and tap ↓, → to execute the Frantic Fury.

*Far Away*

Hold (HQ LQ) and tap →, → to let loose with the Fast Venom Spit.

## Berserk Mode

Your dino goes berserk when it's battered by a damaging combo or a series of moves. In Berserk mode, your dino does more damage than normal.

## It's Human Time!

During a fight your dino doesn't have time to stop and smell the roses – but it does have time to eat a human. Eating humans humiliates your opponent and recharges your life.

The easiest way to snack is by performing a combo on your opponent, which brings the humans to the foreground.

## Hidden Fighters

Looking for more fighters in Street Fighter: The Movie? Get ready to put your street-fighting skills to the ultimate test against three playable hidden characters. Arkane, Kyber, and F7 come equipped with their own sets of Interrupt moves, special moves, and super moves. If you're looking for more fight, you just found it.

### Play as Arkane

To play as Arkane, go to the player-select screen and move the cursor to Blade. Tap ↓ on the controller 20 times, then simultaneously press all three Kick buttons.

### Play as Kyber

To choose Kyber as your fighter, go to the player-select screen and move the cursor to Honda without passing through Ryu or Balrog. Next, move the cursor to the following fighters in this order: Ryu, Honda, Balrog, Honda, Ryu, Honda, Balrog, Honda, Ryu, Honda, Balrog, Honda. Finally, simultaneously press all three Punch buttons.

### Play as F7

To play as F7, go to the player-select screen and move the cursor to the following fighters in this order: Ryu, Ken, Cammy, Chun Li, Honda, Balrog, Blade, Akuma, Blade. As the cursor is on each fighter, simultaneously tap QP and QK, then move to the next fighter. (Note: The timing on the Quick Punch and Quick Kick button presses must be perfect in order for this code to work.)

# Rule the jungle

1. **Background and context:** The book is set in the 1950s, a time of racial segregation and social inequality in the United States. The author, Richard Wright, was a prominent African American writer and social critic.

2. **Main plot:** The story follows the journey of a young African American man, Bigger Thomas, who is struggling to survive in a society that offers him no opportunities. He is forced to work as a chauffeur for a white family and is eventually involved in a series of events that lead to his tragic end.

3. **Themes:** The book explores themes of race, class, and social inequality. It also touches on the themes of identity, power, and the struggle for survival.

4. **Style:** The book is written in a stark, realistic style, with a focus on the harsh realities of life for African Americans in the 1950s. The language is simple and direct, reflecting the author's commitment to social realism.

5. **Significance:** *Native Son* is a landmark work of African American literature. It is one of the most powerful and influential books ever written about the experience of African Americans in the United States.

## A Player's Guide to Power Peripherals

By The Lab Rat

Squeak, squeak, squeak! That's all we hear from that moldy radio rodent, Rash Limburger. Well, forget that rat, we're pumping up the volume in the lab with a serious look at Saturn peripherals.

### Pit-Stop Peripheral

If you dream of more authentic Saturn racing with Daytona USA or Virtua Racer, drop your pad and plug in Sega's steering wheel, the **Arcade Racer**.

This large, realistic-looking Formula One-style wheel is made of sturdy black plastic. You can balance the Racer on your lap, but you'll get a more comfortable ride by setting it on a hard surface like a table.

This controller gives you a good wheel grip and easy thumb access to the six buttons mounted on the wheel's face. Two more convenient flipper buttons, which are used for shifting in Daytona, are found under the wheel. And you won't have to hunch over to steer because an adjustable tilt feature enables you to set the wheel at three angles.

The lab's pit crew gave the Arcade Racer a rigorous workout with Daytona, and everybody felt that the overall control was good. Like driving someone else's car for the first time, the center-return steering takes a little getting used to. And long-time racers who appreciate sensitive control pads may have trouble adapting to the new technique of actually having to twist the peripheral through turns.

Unless you're a diehard racing fan, you may want to let this \$80 wheel roll by. But Saturn owners who have the extra cash (or who live to smell exhaust and run Sunday drivers off the track) will be well rewarded.

### Peripheral

#### Arcade Racer

System: Saturn

**Features:** This Formula One-style steering wheel enhances the racing experience well beyond what the control pad can deliver. A sturdy design, easy button access, and an adjustable tilt steering column make this wheel a must-have for any hardcore Saturn racer.

### Stick Fix

The **Virtua Stick** from Sega will satisfy Saturn gamers looking for an arcade feel for Virtua Fighter. Obviously designed for larger hands, this durable plastic controller has a wider base than previous Sega sticks.

The sturdy joystick is fairly responsive with a shaft as tall as a stick on an arcade machine. The eight-button layout comes complete with a speed adjustment and autofire, and the buttons provide good spring. Although they are larger than control-pad buttons, they're not as large as arcade buttons. At 65 beans, you get a good stick, but what you're really paying for is having it first.

As America is the land of choice, a new company called

HORI is offering another Saturn joystick called the **Fighting Stick SS**. With a wide base, turbo switches, and an eight-button layout, this stick

is similar in design to the Virtua Stick.

But there are differences. The SS's joystick is much shorter than the Virtua Stick's, but the SS's buttons are considerably bigger and clustered closer together. And while the Virtua joystick feels tighter and more durable overall, the loose flexibility of the SS stick makes it easier to pull off some of the special moves in Virtua Fighter. This stick doesn't feel like it will last as long as the Virtua Stick, but it costs \$15 less. **G**

# BUYERS BEWARE

## By The Watch Dog

The school bells are ringing, summer's over, and now you can only play games once your homework is done. Sorry. Didn't mean to rain on your fire hydrant. Speaking of annoyed readers, here are some questions about the 32X, Ken Griffey, and Nintendo's plans for a 32-bit system.

**Q:** I've had Ken Griffey Jr. Baseball for the SNES for a while

Bug alert!

now, and recently I was in the middle of a full season with the Blue Jays. I played the All-Star game, and when I played the next game of the season, some (but not all) of my players' home runs had been erased. Some of these players had more than 30 home runs! What happened?

Nick Wilkening, Santa Rosa, CA

**A:** **Kerry at Nintendo Customer Service states:** Ken Griffey Jr. Baseball sports some pretty serious bugs. In the playoffs, some stats are wiped out completely. In the World Series, stats are sometimes erased, and you won't be able to use your best pitchers. These are just defects in the programming.

## The Watch Dog states:

Defects in the programming? That answer's not good enough, Nintendo! There must be some recourse. You can direct complaints to Nintendo at 800/255-3700.

**Q:** I'm 12 years old. I don't have enough money for a more advanced system, so I was wondering if the SNES is going to come out with something like Sega's 32X?

32SNES?

Tim Benson, Portland, ME

**A:** **The Lab Rat states:** Nintendo will be coming out with the Virtual Boy, a standalone 32-bit system that plays games in only two colors - black and red. The system will retail for \$179, but unfortunately, it won't hook up to your existing SNES the way that the 32X hooks up to your Genesis. For more information, see "The Cutting Edge" in this issue.

**Q:** I received a 32X for Christmas, and now I've heard that Sega may stop making games for it already. Is this true? If it is, I want to know what I should do.

Warren Lee, Dallas, TX

X-tremely untrue

**A:** **A Sega Communications Department spokesperson states:**

We at Sega of America are fully committed to the 32X platform. We will continue to manufacture and market games for the system as we do with all Sega products. This Christmas, you can expect the software library to total more than 40 titles.

**Q:** I use Energizer rechargeable batteries for my Game Gear, and they have to be changed every 2-3 hours. Can you recommend better batteries to use with GamePro?

Eric Henken, Forbes, CA

**A:** **The Watch Dog states:** The color LCD (liquid crystal display) is the battery-draining culprit. Color LCDs will drain a normal alkaline battery in about two hours. Rechargeables are a good idea, but they have a tendency to leak after extended use. The only other solution is to use a battery pack or a solar battery (see "GamePro Labs," March 1994). Both are safe, economical alternatives to rechargeable batteries.

**Q:** A few months ago, I purchased a 3DO. I recently found out that movie CDs can be bought for the 3DO, but I can't seem to find these movie CDs anywhere. Do they really exist? Where can I find them?

Steven Kelly, Melville, NY

**A:** **The Watch Dog states:** In January, it will be possible to watch movies through a Goldstar 3DO by using the Goldstar 3DO MPEG/Digital Video Module. Panasonic is working on a similar product for its 3DO system.

**A:** **GamePro**, listening is what we do best. When you have a problem with a product or feel you've been ripped off, we want to know. If you have a complaint about a product, write to:

## Yoshi's Island

Super NES

Four long years have passed since Super Mario World, the last Mario platform adventure game, was released for the Super Nintendo. Well, Mario's back – but it's not the Mario you remember. Yoshi's Island is actually a prequel to the Mario games, and it sports an all-new look.

It all begins when the stork tries to deliver twin babies to the Mushroom Kingdom. When a baby thief named Kamek snatches one of the babies, a Yoshi – in fact a whole herd of Yoshis – rescues the other tyke. The game traces the adventures of the Yoshis as they try to return the baby (gee, I wonder who he is) to his parents...and maybe they'll find the other twin in the process.

Plug in this cart and the first thing you'll notice is its very different graphics. Yoshi, baby Mario (oops, we gave it away), and the enemy sprites are all roughly the same size as in prior adventures, but there the graphical similarities end.

The backgrounds and game scenery in this newest tale bear a unique look that appears almost as if they've been torn from the pages of a coloring book or been freshly painted. The most noticeable sound on the early cart we looked at was the wailing of baby Mario whenever he gets separated from Mario.

Yoshi has a number of new moves, including the ability to hover, climb, and fire four types of egg weapons. Baby Mario rides on Yoshi's back, and if he's knocked off, he floats in a bubble. Yoshi has a quick countdown to rescue him before the Koopas snatch him.

Beyond that, the multiscrolling gameplay is standard Mario hop-n-bop. Yoshi cruises through the six worlds – each with multiple areas – jumping on enemies, navigating past obstacles, and solving the various puzzles that stand in his path.

Nintendo made heavy-duty use of the Super FX2 chip to endow the game's hundreds of enemy characters with the ability to spin, magnify, and do all kinds of tricks. Yoshi's Island seems straightforward in

the early levels, but as the game progresses, the gameplay grows more complex and challenging. As well as completing the various areas, players can work for high scores by grabbing special items and power-ups.

With all the ruckus going on in gaming these days, Yoshi's Island isn't as new and different as a lot of other games out there. The one and only Mario, though, is bound to be a big hit this Christmas. We'll have a full ProReview on this game in an upcoming issue.

## Virtua Fighter 2

Saturn

Virtua Fighter was just a warm-up for the main act due out this Christmas. Fighting fans know VF 2 kicks tail over the original game. If the Saturn version is faithful to the coin-op, look for better gameplay and sharper, clearer graphics that include texture-mapped polygons and beautiful background scenery.

In addition to the eight original characters, VF 2 will include two new fighters. All

the combatants have additional moves, though the limited combo system is status quo. The two-player head-to-head fighting includes 360-degree rotation of the action as well as instant replays at the end of each round.

## Virtua Cop

Saturn

Up to four players can shoot it out virtually in this popular arcade game that's bound to be a hit for the Saturn. As the Virtua Cop, you tag the bad guys in arcade-style shooting action. Look for an accurate translation of the coin-op game, including the graphics, gameplay, and weapons arsenal. The 3D polygon visuals will zoom in and out during play. Rumor has it that Sega is working on a gun peripheral to go with the game.

# Mortal Kombat 3

Feature

When Mortal Kombat 3 hits all the game platforms this fall, the PlayStation version will be the one to watch. Based on—what else?—the arcade game of the same name, MK 3 will feature identical gameplay that's a nearly pixel-perfect copy of the original.

The seven new warriors will be armed with their individual special moves, finishing moves, Animalities, Friendship moves, Babalities, and more. The game will also include special Komat Kodes and an encryption system that hides special secret powers. Expect the game's new Run button to ramp the gameplay to faster, more intense levels.

The PlayStation's processing power should provide gamers with the most authentic port of Mortal Kombat to a home system yet. Finish 'em!

## Kolibri 32X

The new age comes to the 32X when deep inside the Earth a peaceful crystal is damaged by meteorites. Next thing you know, evil crystals are turning plants and animals into monsters. Only one creature can save the planet—a hummingbird named Kolibri. As Kolibri, you flit, dart, and dodge around the planet in unusual one-player action/adventure gameplay. Similar to Ecco the Dolphin, Kolibri must solve simple puzzles and find the information he needs to free his friends. This game's 3D polygon graphics are especially beautiful and lifelike.

## Blackthorne 32X

In the tradition of Flashback, Blackthorne is an action/adventure strategy game for one player. This dark tale of vengeance, which takes place in underground caverns and rain-soaked forests, requires puzzle solving, quick thinking,

and even quicker reflexes. The hero, Kyle Blackthorne, roams through more than 20 twisting, maze-like levels, each navigable only after you solve numerous logic puzzles and fight hundreds of enemies. The graphics include more than 1000 frames of advanced roto-scoped animations that make for incredibly smooth, lifelike character movements.

## Darkstalkers

PlayStation

Based on the popular arcade game, Darkstalkers puts players into head-to-head combat against legendary beasts of fantasy. The ten creepy combatants include a vampire, werewolf, mummy, samurai ghost warrior, Canadian sasquatch, and a Scottish demon called Succubus.

The one- or two-player fighting action includes the standard best-two-of-three fighting-game setup. Each eerie warrior has the usual repertoire of special moves, but look also for several new

features like midair blocking, special moves that you can charge during battle, and a combo system. A success meter at the bottom of the screen lets you gauge just how good you are.

PlayStation

With X-Men: Children of the Atom, Capcom covers head-to-head fighting from all angles for the Saturn and PlayStation. Ten comic-book stars rumble in Children of the Atom, including four X-Men and as many of their foes. Look for your favorites among this fierce cast: Wolverine, Cyclops, Psylocke, Storm, Ice Man, Colossus, Omega Red, Spiral, Silver Samurai, and Sentinel.

Animation based on the comic and animated television series ties this arcade port to its roots, as do the digitized

voiceovers by actors from the TV cartoon. The two-player action includes such standard fighting-game features as special moves. Options like auto-blocking even up the fighting field for players of different levels.

# toy show tokyo report

Our man in Tokyo dropped in on the Tokyo Toy Show over the summer and filed this report.

By Nob Ogasawara

**T**he Tokyo Toy Show took place in the early summer at the giant Makuhari Messe Convention Center in Chiba. The annual event attracted a congregation of toy makers and distributors, both Japanese and foreign. More than 100 exhibitors showed their latest toys and games in two cavernous buildings with floor space covering approximately five football fields.

## Bandai and Sega Stand Tall

Among the major toy companies, the enormous Bandai group stood supreme with a

The biggest attraction at Sega's ample booth was Virtua

Cop for the Saturn. Sega also sampled Virtua Cop's prototype gun, which looked cool, but it lacked the

kickback that made the arcade version realistic. Still, the game was impressive.

Also on view was an extremely early and unplayable version of Virtua Fighter 2. Although not quite arcade perfect, it still looked very presentable with full texture-mapping and fluid motions. So far, only four characters have been programmed - Pai, Lau, Shun, and Lion. Sega hopes to have VF2 ready for Christmas.

Sega's Virtua Fighter Remix was up and running, too. It looked and played great! Starting in June, the game was to be packed in with 100,000 systems selling at a reduced

price tag of 34,800 yen (down 10,000 yen). VF Remix will be released on its own in mid-July in Japan as a limited-quantity special for just 3400 yen.

## The World of Saturn

Other Saturn games on display included Golden Axe the Duel (a fighting game), Shin Shinobi Den (the ninja's back,

Nearly overlooked among all the great Saturn titles was Treasure's newest, Guardian Heroes, a strange but exciting mix described as a "fighting RPG." To top it all off, Sega announced plans to release Sega Rally Championship for the Saturn in '96!

SNK showed Fatal Fury 3 and Savage Reign, as well as several surprises like A-Com's side-scrolling shooter Pulstar, which attracted a good crowd, and Hudson's Tengai Makyō, a

fighting game featuring characters from the big PC Engine RPG series. Posters for King of Kings '95 were on display, but the

game was nowhere to be seen. There was no word on SNK's 64-bit arcade system, but we know it's coming out, and we'll keep you posted.

### Coming from Capcom

Capcom was showing Darkstalkers for the PlayStation and X-Men for the Saturn – both of

which were faithful to the arcade originals. Capcom also had Final Fight 3 for the Super Famicom with two new characters joining Haggar and Guy for a two-player walk-and-thump-at-on.

interesting array of games. Namco announced Galaxian 3 and Ridge Racer 2 for the PlayStation – the latter enables two players to race against each other using the connector ports on two PlayStation systems (and two TVs).

Atlus had Ridge King the Spirits for the Saturn, while Taito demoed the PlayStation title Ray Tracer. Taito also showed two Saturn shooters: the vertically scrolling Layer Section (known as Ray Force in arcades) and the side-scrolling Darius Gaiden. They also had a StarFox-type shooter for

the PlayStation called *Zeitgeist*.

Takara had two games under development by TSD developer Tam Soft: *Steamgear Mash*, a diagonal-view action game for the Saturn, and *Choro Q*, a 3D-polygon racing game with super-deformed mini cars that were cute and fun.

### Final Tally

One final item of interest is Bandai's Pippin Power Player. This dynamite unit features a full-on PC603 CPU, quad-speed CD-ROM drive, and full compatibility and connectivity with Apple peripherals. It also has full NTSC and PAL input and output capabilities.

Fully compatible with Apple peripherals, the Pippin Power Player was a real grabber.

Summing up, Sega made the strongest showing (but remember, neither Nintendo nor Sony were in attendance). The Tokyo Toy Show also clearly indicated that the Super Famicom's total dominance over the Japanese market is definitely weakening against the onslaught of exciting next-generation games, especially those for the PlayStation and Saturn. It should be interesting to see how Nintendo will try to regain its mastery in Japan on the backs of the Virtual Boy and Ultra 64 over the next year.

One of SNK's most promising titles: No pictures yet, but *The King of Fighters '95* is coming.

The movie characters come to life in *Street Fighter: The Movie* for the PlayStation and Saturn.

Unlike the Atari Jaguar CD, which has struggled to come out with any games at launch, SNK promises to have 70 titles available right away, most from the arcade arena. Fighting games will be riding the first wave of releases—expect *Samurai Shodown*, *Samurai Shodown II*, and *Fatal Fury Special* to join a roster of sports titles in the fall.

Games will cost between \$49 and \$79. One added feature

of the fighting games is the inclusion of a “blood code” option, so gamers can play with or without extra onscreen gore.

See “The Cutting Edge” in the April issue for a look under the hood of this intriguing new system and watch for the first ProReviews of Neo•Geo CD games next month.

## Sega and Sony Go to War

The 32-bit wars have quickly escalated this summer as the top two entrants on the battlefield, **Sega** and **Sony**, launch salvos at each other in an effort to win over eager gamers. Sega twice jumped the gun on its own “Saturday,” which was originally to be the September launch date for the **Saturn**. After releasing the Saturn in America in late May, more than three months ahead of schedule, Sega unleashed its new system

Tom Kalinske, Sega's CEO, predicts big growth for the industry.

on Europe in July to get a two-month advantage over Sony's September 9 launch of the **PlayStation**.

To counter Sega's strategy, Sony has been making price cuts on its PlayStation, giving intrigued gamers reason to wait to make their buying decisions. The U.S. version will be released in September with a \$299 price tag, approximately \$100 less than the Saturn.

In Japan, Sony is hoping to add another 2 million buyers by slashing one-third off the price of a new PlayStation—at about \$359, a Japanese PlayStation is \$120 less than a Japanese Saturn. The PlayStation has already been wildly successful in Japan and has sold more than 2 million units in less than six months.

Even with all the confusion over the launch of the next-generation systems, Sega sees a bright future for the video game industry. In his keynote address at the Electronic Entertainment Expo, Tom Kalinske, president and CEO of Sega, forecasted that the electronic-entertainment industry would grow into a \$9 billion market by the year 2000 because of next-generation sales.

Kalinske added that Sega's planning on selling 600,000 Saturns in the U.S. in 1995—a goal that's gathering steam amidst reports that Sega had already sold 100,000 Saturns by the end of June. The company's strengthening its push with a \$50 million print and TV ad campaign. Sega still expects the Genesis to hold its own, however, the 16-bit machine should represent half of the company's revenues for the next year.

## Bad News for CES

**Nintendo** has announced that it will not participate in the next **Consumer Electronics Show (CES)**, scheduled for January 5-8,

1996, in Las Vegas. The news is a significant blow to the sponsors of the two CES events, which until last year reigned as perhaps the

most important video game trade shows in the country.

Last May, the 1995 Summer CES was supplanted by the **Electronic Entertainment Expo (E<sup>3</sup>)**; and now the Winter CES has lost one of its top-drawing cards, Nintendo. Presumably more companies will follow Nintendo's lead, further diminishing the impact of the winter show.

Instead of Winter CES, Nintendo has committed its support to a single trade show to be held in Los Angeles in May 1996. That still-unnamed show will be staged by the **Interactive Digital Software Association (IDSA)** and a group that includes **Infotainment World**. The publisher of *GamePro*, *SWATPro*, and *Electronic Entertainment*, Infotainment World was one of the prime forces behind last May's E<sup>3</sup> show.

Nintendo Chairman Howard Lincoln said in a news release that “a single trade show commitment will allow us more flexibility in directly communicating our many business plans throughout the year. And in 1996, those plans will include considerable news for the **Virtua Boy**, the **Super NES**, and **Game Boy**, as well as the **Ultra 64**.”

line for the fiscal year that ended in March. While the figures are better than last year's, the uphill road to profitability looks steep. 3DO's revenues totaled \$30.4 million, but the company still lost \$46.3 million. The results, however, dramatically improve

With releases like *BladeForce*, 3DO hopes it will begin climbing out of the red.

over the numbers for the year before: \$10.3 million in revenue with a loss of \$51.4 million. 3DO is hoping its software releases later this year will rake in some much-needed bucks.

In other bad news for 3DO, AT&T, one of its original investors, recently began selling off its 2.5 percent share of the company. According to a story by

Reuters, the sale isn't a reflection on AT&T's confidence in 3DO, but is purely a financial decision based on market considerations.

One positive note for gamers: The price of a 3DO continues to drop. Using a \$50 rebate, buyers can get a Goldstar 3DO with FIFA International Soccer and Shock Wave at Electronics Boutique for \$300.

## VR Headsets Get Warnings

Ever wonder about the possible side effects of wearing a virtual-reality (VR) headset? Some scientists are also wondering, and they've begun sounding the alarm about possible human safety hazards.

An article published June 5 in *Electronic Engineering Times* suggests that Nintendo's *Virtual Boy* and other VR headsets in development, which all place small screens directly in front of the eyes, may cause sickness, flashbacks, and possibly even

permanent brain damage. These are only guesses so far because the long-term effects are still unknown.

Thomas Furness, director of the Human Interface Technology Lab at the University of Washington, has strong opinions about the headsets. In an online article published on CMP's TechWeb, he warns that "there are... long-term psychosocial and psychophysiological effects that need more study before the lawyers start suing."

The makers of the headsets have differing opinions. Tony Ashe, president of StrayLight Corp., a company developing one of the targeted products, claims in the same online article that such hazards are "greatly exaggerated" and that the headsets pose "virtually no danger when used for a short time and with an attendant standing by." How many gamers will wear the headsets for a short time with an attendant nearby is an obvious question. Watch future "ProNews" articles for updates on this budding controversy.

## At the Deadline

The slump in the video game industry continues to hurt retailers. **Toys 'R' Us**, the world's largest toy chain, reported that its first-quarter revenues were down 10 percent in established stores, a decline the company blamed mostly on sluggish video game sales. The arrival of 32-bit systems, however, has made the company "optimistic" about future financial reports.

**Virtual World Entertainment** is getting a boost from the film industry. **United Artists** has agreed to invest in VWE's virtual-reality entertainment centers (see "Hot at the Arcades," December 1994). The UA presence should put

ten more Virtual World interactive attractions in American movie complexes by the end of the decade.

Behind the scenes: **Spectrum HoloByte** is joining with

**ABC Sports** to make PC and 32-bit sports games; **Acclaim** will be working on a 1996 game for various systems based on *The Crow: City of Angels*, the sequel to the 1994 film *The Crow*; **Domark** is reading **Confirmed Kill**, a World War II flight sim that can be played on the Internet by up to 500 players simultaneously; **Interplay** is bringing a new deluxe version of **Descent** to **GEnie Online Services** by the end of summer; and, after a long wait, **Natsume** has released **Wild Guns** for the SNES (see ProReview, November 1994) and plans to release a 32X version sometime next year.

**GamePro** recently paid a visit to **DigiPen**, the small

school in Vancouver, British Columbia that teaches one thing: video game programming. Here's the news in a nutshell: The school offers an

**Students study video game programming at DigiPen.**

intense two-year course of study; right now DigiPen has about 30 students from many countries. Applicants must be at least 18 years old, and the cost is about \$6000 per year. Call Jason Chu at 604/682-0300 for information and applications, and watch our ongoing special series "The GameMakers" for an in-depth report. 

## SONY LAUNCHES SPORTS DIVISION

**Sony** recently announced that a new development studio is up and running, devoted exclusively to sports titles. This yet-to-be-named San Diego studio is currently developing five sports titles for the **PlayStation**. The first, **ESPN Extreme Games**, will be available when the PlayStation launches in September.

**NFL Game Day** and **NHL Face Off**, both working titles, are scheduled for a November release. These two games will feature pro licenses, rendered players, and multiple views. The *Game Day* design team got expert assistance from Kansas City Chiefs' starting quarterback, Steve Bono. Bono helped create a playbook that reflects current NFL trends.

Also in the works are an unnamed Major League Baseball game and a racing title, which are scheduled to be available in the spring of '96.

**NHL Face Off** is slated for a November release.

# RETROMAGS

Our goal is to preserve classic video game magazines so that they are not lost permanently.

People interested in helping out in any capacity, please visit us at [retromags.com](http://retromags.com).

No profit is made from these scans, nor do we offer anything available from the publishers themselves.

If you come across anyone selling releases from this site, please do not support them and do let us know.

Thank you!
